

## Energy Efficiency and Sustainable Energy Board

### Statement of Governing Principles

#### A. Legal Authority and Responsibility

The Energy Efficiency and Sustainable Energy Board (“EESE Board”) was created in 2008, by RSA 125-O:5-a. The Board’s central charge is “to promote and coordinate energy efficiency, demand response, and sustainable energy programs in the state.” The responsibilities of the Board as specified in the statute include a requirement to provide recommendations to the public utilities commission on the administration and allocation of energy efficiency and renewable energy funds and to report annually on December 1 on the activities of the Board to the governor, the speaker of the house of representatives, the president of the senate, the house science, technology and energy committee, the senate energy, environment and economic development committee, and the public utilities commission.

NH Chapter 335 of the Laws of 2010 (“SB323”), which required the Public Utilities Commission (PUC) to contract for an independent study of energy policy issues, also called for the EESE Board to “provide its recommendations upon review of the comprehensive study to the senate president, the speaker of the house of representatives, and the chairs of the senate energy, environment and economic development committee and the house science, technology and energy committee as soon as practicable.”

The EESE Board falls under the definition of “Advisory Committee” pursuant to the provisions of RSA 91-A, the state’s Open Meeting Law, and is required to comply with its various provisions.
