Re: Amended Quarterly Emissions Verification Summary for Certified Renewable Energy Sources (Dockets DE 08-024, DE 08-044, DE 08-051, DE 09-008 and DE 09-104)

Dear Ms. Howland:

Based on the attached amended summary, the New Hampshire Department of Environmental Services (DES) recommends certification of the following wood-fired power plants as renewable energy sources, because the facilities continue to meet average emission rates of 0.02 lb/MMBtu and 0.075 lb/MMBtu, for particulate (TSP) and nitrogen oxides (NOx), respectively:

Pinetree Power, Inc.
1241 Whitefield Rd
Bethlehem, NH 03574

Pinetree Power-Tamworth, Inc.
469 Plains Rd
Tamworth, NH 03886

Public Service Company of New Hampshire (PSNH) Schiller Station # 5
400 Gosling Rd
Portsmouth, NH 03801

Please note that the following plant did not meet the 0.075 lb/MMBtu for NOx as required by statute (RSA 362-F) and is not eligible for the third quarter:

Indeck
151 Smith River Road
Alexandria, NH 03222

Please note that the following plant did not test for TSP within the past year as required by statute (RSA 362-F) and is no longer eligible beginning with the fourth quarter of 2010:

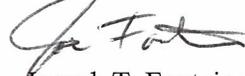

Springfield Power, LLC
54 Fisher Corner Road
Springfield, NH 03284

Furthermore, DES did not receive an affidavit from Springfield Power for the third quarter. Thus, while Springfield Power's emissions met the emission rates for the third quarter, the PUC may suspend certification under PUC 2505.04(f)(2) for failing to provide a quarterly filing.

In accordance with PUC 2505.04(g) through (i), the suspension of certification shall be for so long as the facility is out of compliance with the limit on emissions. A suspended facility shall have its suspension lifted upon demonstration to the commission of certification by the department that it meets the limits on emissions. Upon such demonstration, the facility shall be certified to be issued certificates as of the next calendar quarter.

If you have any questions regarding DES's recommendations, please contact me at joseph.fontaine@des.nh.gov or (603) 271-6794.

Sincerely,

Joseph T. Fontaine
