RE: DE 08-122 The Lee Company  
Application for Certification as a Class II Renewable Energy Source  
Items Requiring Completion

Dear Mr. Lee:

On September 23, 2008 The Lee Company (Lee) submitted an application requesting certification as eligible to produce Class II renewable energy certificates (RECs) pursuant to RSA 362-F, New Hampshire's Renewable Portfolio Standard law. In reviewing Lee's application, the following items must be clarified:

- 1) Pursuant to Puc 2505.02 (b) (4), the GIS facility code must be supplied, if available. On the application, Lee stated that the facility code has not yet been obtained. When does Lee expect to the facility code? Please be advised that the facility code must be provided to the Commission once it is obtained.
- 2) Pursuant to Puc 2505.02 (b) (7), the application must include "[A]ll other necessary regulatory approvals, including any reviews, approvals or permits required by the department." Lee submitted an "Inspection Request" for the Town of Westbrook. Was there any final approval or other regulatory procedures which had to be complied with? What regulatory approvals does the State of Connecticut require for a solar photovoltaic facility?
- 3) How will the facility's output be verified by ISO-New England? Please provide the specific portions of the interconnection agreement or the "Guidelines for Generator Interconnection" (which were not included) which address this issue.

Please address these items within 30 days so that Staff may proceed with your request to be certified as eligible to produce Class II renewable energy certificates. Also, please be advised that you should reference the docket number, DM 08-122, in all future correspondence with the Commission. Should you have any questions, please do not hesitate to contact me.

Sincerely,

A handwritten signature in cursive script that reads "Henry J. Bergeron".
