Re:

DE 09-083, WM Renewable Energy, L.L.C.

Certification Application for Class III Eligibility of its Turnkey I Landfill facility Pursuant to

RSA 362-F

Dear Ms. Glenn:

Latoya Glenn

On April 30, 2009, WM Renewable Energy, L.L.C. (WMRE) submitted an application requesting certification of the Turnkey landfill methane gas facility (Turnkey I facility) as eligible to produce Class III renewable energy certificates (RECs) pursuant to RSA 362-F, New Hampshire's Electric Renewable Portfolio Standard law. Staff has reviewed the application and recommended approval noting that the WMRE application was complete on April 30, 2009.

Class III eligibility requires a facility to have begun the production of electricity prior to January 1, 2006 using either eligible biomass technologies having a gross nameplate capacity of 25 megawatts or less or methane gas. The application indicates that the Turnkey I facility has a gross nameplate capacity of 3.2 megawatts and is located at 30 Rochester Neck Road, Rochester, New Hampshire. The facility began commercial operation in March 1992. The facility's NEPOOL generation information system facility code is MSS253.

The Commission has reviewed the WMRE application and determined that it has provided all the necessary information to demonstrate that the Turnkey I facility is eligible for certification as a Class III facility. Therefore, the Commission hereby certifies that the Turnkey I facility is a Class III renewable energy source effective April 30, 2009 and is eligible to be issued New Hampshire Class III renewable energy certificates.

Attached please find a copy of the notice of this certification provided to the GIS administrator. The New Hampshire Renewable Portfolio Standard certification code for the Turnkey I landfill methane gas facility is NH-III-09-022.

Certification of its Turnkey I Landfill facility as a New Hampshire RPS Class III Facility

Pursuant to RSA 362-F

New Hampshire Certification Code NH-III-09-022

Dear Mr. Webb:

Please be advised that, pursuant to NH RSA 362-F, the New Hampshire Public Utilities Commission has certified WM Renewable Energy (WMRE)'s Turnkey I landfill methane gas facility as a Class III renewable energy source effective April 30, 2009. Accordingly, WMRE's Turnkey I facility is eligible to be issued New Hampshire Class III renewable energy certificates.

The Turnkey I facility has a gross nameplate capacity of 3.2 megawatts, is powered by landfill methane gas and is located at 30 Rochester Neck Road, Rochester, New Hampshire. The facility began commercial operation in March 1992. The facility's NEPOOL generation information system facility code is MSS253. The New Hampshire RPS certification code is NH-III-09-022.
