Re: DE 09-269, New Hampshire Electric Cooperative, Inc.'s Certification Application on behalf of the Town of Plymouth for Class II Eligibility Pursuant to RSA 362-F

Dear Mr. McNeil:

On December 21, 2009, you submitted an application on behalf of the Town of Plymouth requesting certification of its photovoltaic facility (Plymouth facility) as eligible to produce Class II renewable energy certificates (RECs) pursuant to RSA 362-F, New Hampshire's Electric Renewable Portfolio Standard law. Staff has reviewed the application and recommended approval noting that the application was complete on December 21, 2009.

Class II eligibility requires that a facility began operation after January 1, 2006 and that it produces electricity from solar technologies. Your application indicates that Larry Mauchly installed a photovoltaic facility with a gross nameplate capacity of 0.016 kilowatts at the Town of Plymouth Pavilion, Riverside Park, Green Street, Plymouth, New Hampshire. The facility began operation on September 22, 2009, when the New Hampshire Electric Cooperative, Inc. (NHEC) installed the facility's revenue quality meter. The application states that NHEC will monitor the facility's output as required by N.H. Code of Admin. Rules Puc 2505.

The Commission has reviewed your application and determined that it has provided all the necessary information to demonstrate that the Plymouth facility is eligible for certification as a Class II facility. Therefore, the Commission hereby certifies that the Plymouth facility is a Class II renewable energy source effective December 21, 2009 and is eligible to be issued New Hampshire Class II renewable energy certificates. The New Hampshire Renewable Portfolio Standard certification code for the Plymouth facility is NH-II-10-026.

Sincerely,

A handwritten signature in dark ink, appearing to read "Debra A. Howland".

Debra A. Howland
