Subject: RE: DE 10-024 - Opportunity to Comment on Renewable Energy Fund

Hello Jack – Sorry you had trouble getting through to us. It sounds like there must have been a technical issue with our phone service – which is highly unusual.

With regard to your question, the answer is that Staff has recommended that the rebate not be offered retroactively. However, the final decision rests with the three PUC Commissioners, and they will be presiding at the public hearing here on Thursday at 10 a.m. If you are unable to attend you may also submit written comments to me, which I will forward to the Commissioners.

Regards,

Jack Ruderman

So, as I read this, since we installed a 3 panel system last year, we are NOT eligible for an incentive payment.

I've tried to call your office 271-2431, but the phone just rings constantly with no answer or no recording.
