RE: DE 10-060 Customer Sited Renewable Sources Independent Monitor Fourth Quarter 2012 Aggregation Report - REVISED

DE 09-006 Annual Monitoring Report for 2012 - REVISED

Dear Ms. Howland,

Please find enclosed an original and 8 copies of two reports. First is a *revised version of* New Hampshire Electric Cooperative, Inc.'s (NHEC's) report of requested Customer Sited Renewable Sources aggregation for the fourth quarter of 2012 in accordance with the Commission's Aggregation approval of April 9, 2010. NHEC discovered that 2 resources were inadvertently not included in the original report. It is NHEC's intention to report this generation in the NEPOOL Generation Information System for fourth quarter 2012.

As shown in the report, the total capacity of the Class II aggregated sources is approximately 637.17 kW. NHEC requests that the Commission please update the NEPOOL GIS Administrator regarding this approved capacity.

The second report is NHEC's *revised* annual monitoring report for the calendar year 2012 in accordance with the Commission's approval of NHEC as an independent monitor.

I apologize for any inconvenience caused by these revisions.
