The Northeast Utilities System

Exhibit #	# 2A
Witness	Daniel
DO	FILE

July 2, 2010

Ms. Debra A. Howland  
Executive Director & Secretary  
State of New Hampshire  
Public Utilities Commission  
21 S. Fruit Street, Suite 10  
Concord, NH 03301-2429

Re: Docket No. DE 10-121 – Reconciliation of Energy Service and Stranded Costs  
for Calendar Year 2009

Dear Secretary Howland:

Enclosed for filing in the docket referenced above are an original and six copies of  
the supplemental testimony of David A. Errichetti. This testimony corrects an error  
that was discovered in the testimony originally filed in this docket.

Very truly yours

Stephen R. Hall  
Manager  
Rate & Regulatory Services

SRH:dm

STATE OF NEW HAMPSHIRE  
BEFORE THE PUBLIC UTILITIES COMMISSION

Public Service Company of New Hampshire  
Reconciliation of Energy Service and Stranded Costs for  
Calendar Year 2009

SUPPLEMENTAL  
DIRECT TESTIMONY OF  
DAVID A. ERICHETTI

1 **I. INTRODUCTION**

2

3 Q. Please state your name.

4 A. My name is David A. Errichetti.

5

6 Q. Mr. Errichetti, please provide your business address and title.

7 A. My business address is 107 Selden St. , Berlin, Connecticut. I am a Manager in the  
8 Wholesale Power Contracts department of Northeast Utilities Service Company  
9 (NUSCo).

10 Q. Did you provide direct testimony in this proceeding?

11 A. Yes. My Direct Testimony was filed on April 30, 2010.

12

13 Q. Does that testimony now need to be corrected?

14 A. Yes it does.

15

16 Q. Please describe the changes that need to be made to your direct testimony.

17 A. In preparing responses to Staff's first set of data requests it was discovered that the  
18 bilateral purchases identified in Attachment DAE-3 and the corresponding Q and A only  
19 addressed bilateral purchases that served ES load and not total bilateral purchases as had  
20 been the case in previous reconciliation filings. Attached to this Supplemental Testimony  
21 is a supplemental Q and A for the last question on page 3 that carried over to page 4 of  
22 my direct testimony in both corrected and redlined versions showing where the changes  
23 were made. Also attached is a Supplemental Attachment DAE-3. These attachments  
24 should replace the last question on page 3 that carried over to page 4 of my direct  
25 testimony and my Attachment DAE-3 in my direct testimony filed on April 30, 2010.

1

2 Q. Does that conclude your supplemental testimony?

3 A. Yes.

Supplemental response of last question on page 3 that carried over to page 4 of David A Errichetti's direct testimony.

1 Q. Please summarize how supplemental purchases were used to meet PSNH's energy  
2 requirements.

3 A. Supplemental Attachment DAE-3 summarizes the purchases made to supplement  
4 PSNH's generating resources. Approximately 1,589 GWh of on-peak energy were  
5 purchased bilaterally at an average cost of \$98.90 per MWh (a total expense of \$157.1  
6 million). 88% of the on-peak bilateral energy was procured via fixed-price monthly  
7 contracts in order to address the forecasted supplemental requirements and planned unit  
8 outages. 9 % was procured via fixed-price, unit-contingent contracts with the Bethlehem  
9 and Tamworth Generating Plants. The remaining bilateral energy (3 %) was procured via  
10 fixed-price short-term arrangements (e.g. daily, weekly) to address unplanned outages  
11 and higher load periods. In addition, approximately 114 GWh of on-peak energy were  
12 procured via the ISO-NE hourly spot market at an average cost of \$51.89 per MWh (a  
13 total expense of \$5.9 million).

14  
15 Approximately 994 GWh of off-peak energy were purchased bilaterally at an average  
16 cost of \$80.13 per MWh (a total expense of \$79.7 million). 82 % of the off-peak bilateral  
17 energy was procured via fixed-price monthly contracts. 16 % was procured via fixed-  
18 price, unit-contingent contracts with the Bethlehem and Tamworth Generating Plants.  
19 The remaining bilateral energy 2 % was procured via fixed-price short-term arrangements  
20 (e.g. daily, weekly). In addition, approximately 145 GWh of off-peak energy were  
21 procured via the ISO-NE hourly spot market at an average cost of \$41.58 per MWh (a  
22 total expense of \$6.0 million). The combined expense for all supplemental energy  
23 purchases was \$248.8 million.

24

Redlined supplemental response of last question on page 3 that carried over to page 4 of David A Errichetti's direct testimony.

1 Q. Please summarize how supplemental purchases were used to meet PSNH's energy  
2 requirements.

3 A. Supplemental Attachment DAE-3 summarizes the purchases made to supplement  
4 PSNH's generating resources. Approximately 1,589 ~~1,189~~ GWh of on-peak energy were  
5 purchased bilaterally at an average cost of \$98.90 ~~98.12~~ per MWh (a total expense of  
6 \$157.1 ~~116.7~~ million). 88% of the on-peak bilateral energy was procured via fixed-price  
7 monthly contracts in order to address the forecasted supplemental requirements and  
8 planned unit outages. 9 ~~8~~% was procured via fixed-price, unit-contingent contracts with  
9 the Bethlehem and Tamworth Generating Plants. The remaining bilateral energy (3 ~~4~~%)  
10 was procured via fixed-price short-term arrangements (e.g. daily, weekly) to address  
11 unplanned outages and higher load periods. In addition, approximately 114 GWh of on-  
12 peak energy were procured via the ISO-NE hourly spot market at an average cost of  
13 \$51.89 per MWh (a total expense of \$5.9 million).

14  
15 Approximately 994 ~~696~~ GWh of off-peak energy were purchased bilaterally at an  
16 average cost of \$80.13 ~~78.74~~ per MWh (a total expense of \$79.7 ~~54.8~~ million). 82 ~~84~~%  
17 of the off-peak bilateral energy was procured via fixed-price monthly contracts. 16 ~~13~~%  
18 was procured via fixed-price, unit-contingent contracts with the Bethlehem and  
19 Tamworth Generating Plants. The remaining bilateral energy 2 ~~3~~% was procured via  
20 fixed-price short-term arrangements (e.g. daily, weekly). In addition, approximately 145  
21 GWh of off-peak energy were procured via the ISO-NE hourly spot market at an average  
22 cost of \$41.58 per MWh (a total expense of \$6.0 million). The combined expense for all  
23 supplemental energy purchases was \$248.8 ~~183~~ million.
