Subject: RE: Order of Notice pertaining to the NH Residential Renewable Energy Generation Incentive Program

Hi Diane,

Your name was passed along by colleagues of ours at DESIRE. I work for Southwest Windpower, a leading manufacturer of distributed wind energy systems and developer of commercial-scale wind energy projects.

As we understand it, a public hearing is taking place tomorrow (Sept 1st) at 10am ET to discuss the Residential Renewable Energy Generation Incentive Program. We hope to make this meeting in person (21 South Fruit Street, Suite 10, Hearing Room A/Rm 103 – hope I have this correct?). If unable to attend, we will be sure to provide comments by Sept 7th. Any chance you have contact information for the individual collecting comments from industry stakeholders?

In summary, we would like to encourage the PUC to maintain its existing rebate award level for residential wind electrical generation facilities at \$3.00/watt. We would also like to encourage the PUC to consider expanding its program to include commercial-scale/multi-unit projects, at the \$3.00/watt level (below is a photo of one of our commercial-scale wind projects in CA).

Looking forward to hearing from you.

Best,

Jay
