Utility Analyst III

SUBJECT: Staff Recommendation Re: DE 10-209 and DE 10-210, New Hampshire Electric Cooperative, Inc. Certification Applications for Class II Eligibility Pursuant to RSA 362-F on behalf of homeowners Peter Halfman and Ronald Haven

TO: Chairman Thomas B. Getz
Commissioner Clifton C. Below
Commissioner Amy L. Ignatius
Debra A. Howland, Executive Director

CC: Jack K. Ruderman, Director, Sustainable Energy Division
Suzanne Amidon, Staff Attorney

Summary

On August 9, 2010, New Hampshire Electric Cooperative, Inc. (NHEC) submitted two applications on behalf of homeowners Peter Halfman and Ronald Haven requesting that the Commission grant approval of photovoltaic facilities located at their residences to produce Class II Renewable Energy Certificates (RECs) pursuant to RSA 362-F, New Hampshire's Electric Renewable Portfolio Standard law. Pursuant to RSA 362-F:4, II, Class II eligibility requires that a facility produce electricity from solar technologies and that it began operation after January 1, 2006.

Pursuant to RSA 362-F, the Commission, in a non-adjudicative process, is required to issue a determination of whether a facility meets a particular classification within 45 days of receipt of a completed application. The two above-named facilities are customer-sited photovoltaic rooftop arrays that began operation in August 2010. The facilities meet the Class II eligibility requirements under RSA 362-F:4, II. Based on its review of the applications, Staff recommends that the Commission approve the facilities as eligible for Class II RECs effective August 9, 2010.

Analysis

The facilities are customer-sited photovoltaic rooftop arrays located in New Hampshire that began operation in August 2010. The facilities' gross nameplate capacities are 4.83 and 7.74 kilowatts (kW), respectively. The details for each facility are listed in the following table.

Commission Assigned Docket #	Facility Owner	Facility Location	Equipment Vendor	Installing Electrician	Operation Date¹	Total kW listed in application (DC Arrays)
DE 10-209	Peter Halfman	Meredith, NH	Tim Golden DBA Band Technology	Gary Sawicki	August 5, 2010	4.83
DE 10-210	Ronald Haven	Moultonboro, NH	Frase Electric, LLC	Kim Frase	August 2, 2010	7.74

Pursuant to the N. H. Code of Administrative Rules Puc 2505.08, the applicant is required to submit a complete list of the equipment used at the facilities and certain information regarding the installer, seller and independent monitor. Each facility's equipment vendor and installing electrician are listed in the previous table. The New England Independent System Operator asset identification numbers are not applicable as the facilities are customer-sited sources. Since the facilities are customer-sited sources, their output is not recorded in the New England Power Pool (NEPOOL) Market Settlement System and, as a result, their output must be monitored and verified by an independent monitor pursuant to Puc 2505.09. The applications identify NHEC as the independent monitor. The Commission granted NHEC such status on May 12, 2009 in DE 09-006.

On April 9, 2010, the Commission also granted NHEC the authority to aggregate customer-sited sources pursuant to Puc 2506. See DE 10-060. Therefore, in addition to reporting each source's output to the Commission, NHEC will include the total output of these facilities when it reports the total output of all of its Class II eligible facilities, under the name *NHEC Class II Aggregation*, to the NEPOOL Generation Information System.

The applicant is also required to provide a copy of the interconnection agreement, proof that each facility's distribution utility approved the installation, and a signed attestation that each facility meets applicable building codes. NHEC provided a copy of the approved interconnection agreement and signed attestation that NHEC, as the distribution utility, approved the installation of each facility. Each application included a signed attestation that was originally provided to NHEC indicating that each project was

¹ NHEC considers the operation date listed in the table above, and in Appendix E of each application, to be the date on which NHEC inspected each facility and installed a revenue quality meter to record the electricity that will be eligible for Class II RECs. The date listed in each interconnection application pertains to the installation and interconnection of each facility and may be different than the operation date listed in the above table.

installed and operating in conformance with any applicable building codes. Staff recommends that the Commission find that these signed attestations meet Puc 2505.08 (b) (7) and (8).

Recommendation

Staff has reviewed NHEC's applications for photovoltaic facilities located on the above-named homeowners' rooftops and can affirm that they are complete pursuant to Puc 2505.08. Staff recommends that the Commission certify the Peter Halfman and Ronald Haven facilities as being eligible for Class II RECs effective August 9, 2010, the dates on which Staff was able to make a determination that the facilities meet the requirements for certification as Class II renewable energy sources.
