Re: DE 10-289 Clean Asset Partners Corporation

Application for Class II Eligibility of the Elysium Photovoltaic Facility

Pursuant to RSA 362-F on behalf of Elysium, LLC

Dear Mr. Kaufman:

On October 28, 2010, Clean Asset Partners Corporation (CAP) submitted an application on behalf of Elysium, LLC requesting certification of the Elysium customersited photovoltaic facility (Elysium facility) as eligible to produce Class II renewable energy certificates (RECs), pursuant to RSA 362-F, New Hampshire's Electric Renewable Portfolio Standard law. Staff has reviewed the application and recommended approval, noting that the application was completed on October 28, 2010.

Class II eligibility requires that a facility began operation after January 1, 2006 and that it produces electricity from solar technologies. The application indicates that the Elysium facility is an 82 kilowatt customer-sited photovoltaic rooftop array located at 100 University Drive, Amherst, Massachusetts that began operation on June 8, 2009. The facility's New England Power Pool (NEPOOL) Generation Information System facility code is NON 33070.

Since the facility is a customer-sited source, its output is not recorded in the NEPOOL Market Settlement System and, as a result, its output must be monitored and verified by an independent monitor. The application states that Quincy Vale will monitor the facility's output as required by the New Hampshire Code of Administrative Rules Puc 2505.09.<sup>1</sup>

<sup>&</sup>lt;sup>1</sup> On September 14, 2010, the Massachusetts Department of Energy Resources approved Quincy Vale as an independent third party meter reader pursuant to the NEPOOL GIS Operating Rule 2.5 (j).

Based on Staff's recommendation, the Commission has determined that CAP has provided all the necessary information to demonstrate that the facility is eligible for certification as a Class II facility. Therefore, the Commission hereby certifies that the Elysium facility is a Class II renewable energy source effective October 28, 2010 and is eligible to be issued New Hampshire Class II renewable energy certificates.

The New Hampshire Renewable Portfolio Standard certification code for the Elysium photovoltaic facility is NH-II-10-116.

Sincerely,

Debra A. Howland Executive Director

Del A. Wouland

Re: DE 10-289, Elysium, LLC

Certification of the Elysium Photovoltaic Facility as a New Hampshire RPS Class II

Facility Pursuant to RSA 362-F

New Hampshire Certification Code NH-II-10-116

Dear Mr. Webb:

James Webb

Please be advised that, pursuant to RSA 362-F, the New Hampshire Public Utilities Commission has certified the Elysium photovoltaic facility (Elysium facility) as a Class II renewable energy source effective October 28, 2010. Accordingly, the Elysium facility is eligible to be issued New Hampshire Class II renewable energy certificates.

The Elysium facility is a 0.082 megawatt (MW) customer-sited photovoltaic rooftop array located at 100 University Drive, Amherst, Massachusetts that began operation on June 8, 2009. Quincy Vale, the facility's independent monitor, will verify and report to the NEPOOL Generation Information System (GIS) the facility's behind-the-meter electrical output using facility code NON 33070 pursuant to the NEPOOL GIS Operating Rules. The facility's New Hampshire certification code is NH-II-10-116.

Sincerely,

Debra A. Howland **Executive Director**
