**RE: NORTHERN NEW ENGLAND TELEPHONE OPERATIONS LLC d/b/a FairPoint
Communications-NNE, Request for Modification of Total Amount at Risk
Under Performance Assurance Plan, Docket No. 2009-291**

**MAINE PUBLIC UTILITIES COMMISSION, Investigation into Simplified
Performance Assurance Plan (PA) for Northern New England Telephone
Operations LLC, d/b/a FairPoint Communications, Docket No. 2009-334**

Dear Ms. Geraghty:

Enclosed please find an original and one copy of Northern New England Telephone
Operations LLC d/b/a FairPoint Communications-NNE's Opposition and Response to Joint CLECs'
Motion to Consolidate and Adopt Procedural Schedule in the above-referenced proceedings.

Sincerely,

Joseph G. Donahue
Counsel to FairPoint Communications-NNE

Enclosure

cc: All Parties on Service List in Docket Nos. 2009-291 & 2009-334 (via email)

STATE OF MAINE

July 15, 2011

PUBLIC UTILITIES COMMISSION

NORTHERN NEW ENGLAND TELEPHONE
OPERATIONS LLC, d/b/a FairPoint Communications-
NNE, Request for Modification of Total Amount at Risk
Under Performance Assurance Plan

Docket No. 2009-291

MAINE PUBLIC UTILITIES COMMISSION,
Investigation into Simplified Performance Assurance
Plan (PAP) for Northern New England Telephone
Operations LLC, d/b/a FairPoint Communications

Docket No. 2009-334

**FAIRPOINT OPPOSITION AND RESPONSE TO JOINT CLECS'
MOTION TO CONSOLIDATE AND ADOPT PROCEDURAL SCHEDULE**

NOW COMES Northern New England Telephone Operations LLC d/b/a FairPoint Communications-NNE ("FairPoint") and hereby submits its Opposition and Response to the Motion to Consolidate and Adopt Procedural Schedule¹ ("Motion") of Mid Maine Telplus d/b/a Mid Maine Communications and CRC Communications of Maine, Inc., collectively doing business as OTT Communications ("OTT"), Biddeford Internet Corp., d/b/a Great Works Internet ("GWI"), and CTC Communications Corp., Lightship Telecom LLC, Choice One Communications of Maine Inc., and Conversent Communications of Maine LLC (all doing business as "One Communications") (collectively, the "Joint CLECs"). In the Motion, the Joint CLECs move that the Commission consolidate the two above-captioned proceedings and adopt the Proposed Consolidated Schedule attached to the Motion for both proceedings.

¹ In addition to opposing the Joint CLECs' Motion, this filing also serves as FairPoint's reply to the comments of the Joint CLECs on FairPoint's proposed schedule for Docket No. 2009-291, which were contained in Section II of the Motion.

In effect, the Joint CLECs seek to consolidate these two proceedings into a single proceeding, in which hearings would not be held until June of 2012, almost a year from now. The consolidation of these two proceedings is not justified and would only serve to further delay decision on the relatively straight-forward issues in the so-called dollars at risk proceeding in Docket No. 2009-291. Furthermore, the schedule proposed by the Joint CLECs, whether as a joint schedule or as applying solely to the Simplified PAP docket (Docket No. 2009-334), is unreasonably and unnecessarily prolonged and is an invitation to administrative inefficiency (as work would expand to fill the time available). Accordingly, the Motion should be denied.

I. Consolidation of the two proceedings is not necessary, nor reasonable.

Almost four months after FairPoint initiated these two proceedings, the Joint CLECs now move to consolidate the two proceedings and consume nearly another year of the parties' and this Commission's time. The motion was filed only after the Hearing Examiner set a deadline for the Joint CLECs to comment on FairPoint's proposed schedule for Docket No. 2009-291, and after FairPoint filed its Direct Testimony, which now postures the case for the immediate commencement of processing. The timing of the motion and the thinness of its justification suggests that the objective of the motion is not administrative efficiency, but instead simple delay tactics.

The basic issue in Docket No. 2009-291 is the determination of the appropriate amount of exposure to FairPoint of total PAP credits for purposes of the current PAP. As demonstrated in FairPoint's Direct Testimony, filed on July 6, 2011, the amount at risk in the current PAP is excessive and unrelated to what is necessary to provide the appropriate level of incentive that corresponds to the activities subject to the PAP. Despite the efforts of the Joint CLECs to link the two dockets, the fact remains that the issues involved in Docket No. 2009-291 involve only the dollars at risk – a static figure that is unaffected by the resolution of issues regarding the

metrics standards, scoring system and overall structure of the Simplified PAP. It is simply a number to which the calculated factor under the existing PAP will be applied.

The Joint CLECs state that evaluation of the proper level of dollars at risk will require analysis and comparison of "past performance" and a determination of whether the dollars at risk "under the current PAP" have met the objectives of the PAP. Assuming that this evaluation and analysis is necessary, the fact remains that it is unrelated to the issues regarding the design of a different, simplified, PAP going forward. The Joint CLECs' efforts to shoehorn the dollars at risk amount in the existing PAP into a proceeding regarding an entirely new performance plan should be rejected by the Commission as unnecessary.

The Joint CLECs also argue that consolidation will make more efficient use of the resources of the parties. However, the value of this argument is seriously undermined by the fact that the dollars at risk proceeding in New Hampshire has been stayed, and that the Joint CLECs and their affiliates are presently urging the New Hampshire Public Utilities Commission to continue the stay. (See Attachment A.) Consequently, even if the dollars at risk proceeding is consolidated in Maine and Vermont, there will still be duplication of effort in re-litigating the issue in New Hampshire.

Furthermore, consolidation can lead to more efficient use of resources only if the matters being consolidated are sufficiently related to each other. In this case, however, the focus of the two dockets is entirely different and an attempt to process both dockets under the identical procedural schedule is not likely to bring any efficiencies. Rather, it may lead to unnecessary confusion and likely only serve to prolong the decision-making process in Docket No. 2009-291, which should otherwise be ready for a hearing by October 2011. The Joint CLECs assert that processing the dockets separately will distract the parties from attention to the Simplified PAP docket. FairPoint asserts the result will be opposite: that the consolidation of two distinct

dockets is potentially a greater source of distraction. Accordingly, FairPoint requests that the Commission reject the request for consolidation of the two dockets and establish a schedule for the processing of the dollars at risk docket, consistent with the schedule proposed by FairPoint on July 1, 2011.

II. The Joint CLECs' objections to FairPoint's Proposed Schedule for Docket No. 2009-291 are baseless.

In Section II of their Motion, the Joint CLECs complain that the schedule proposed by FairPoint is not realistic and too aggressive. The Joint CLECs act as if this proceeding started yesterday. Prior to the adoption of FairPoint's proposed schedule, the Joint CLECs have had three months to consider their discovery and testimony, during a time in which they were burdened with no significant activity in this docket. Furthermore, the activities which the Motion claims are necessary to deciding the dollars at risk case do not need a year to complete. Assuming all of these activities are even necessary, the "detailed information concerning FairPoint's performance" and information regarding "the PAP penalties paid" is already readily available if the Joint CLECs wish to ask. (It is not necessary, as implied by the Joint CLECs, to complete the PAP audit in New Hampshire before a reasonable analysis can be conducted.) Also, the "vetting of the conditions" is a type of regulatory process that can be conducted within a few weeks, as distinguished from the many months suggested by the Joint CLECs.

The schedule as currently proposed by FairPoint would result in a decision within about nine months after Docket No. 2009-291 was initiated. If the Commission can complete a full-blown rate case within that time and complete a major reorganization case within three months less than that amount of time, there is no reason to believe that the discreet and limited issues

in Docket No. 2009-291 cannot be completed within the timeframe of the schedule proposed by FairPoint.²

The Joint CLECs might perhaps argue that FairPoint should be indifferent to the length of time it takes to complete this proceeding, given that FairPoint proposes that the new dollars at risk amount be made effective retroactively as of March 31, 2011. However, it is not presently known whether and to what extent the Commission will implement FairPoint's request. Moreover, the fact that a decision may be implemented retroactively is not a compelling reason for the Commission to not render a decision in the proceeding within a reasonable amount of time, and to eliminate the unnecessary burden and uncertainty associated with a prolonged proceeding.³

III. The CLECs' proposed consolidated schedule is not reasonable.

Regardless of whether the Joint CLECs' proposed schedule applies to both Dockets or just to the Simplified PAP Docket, the schedule is unreasonable. While FairPoint agrees that the holding of workshops to reduce discovery and increase understanding is reasonable, and that it is reasonable that such workshops be held jointly among the three states, FairPoint believes that the timeline proposed by the Joint CLECs contains unneeded steps and is much too attenuated. When one adds an estimated two months after the proposed June 2012 hearings for briefing and decision, at a minimum, it is apparent that the proposed schedule will result in a decision being made more than a year from now. The schedule has too many steps

² The repeated references by the Joint CLECs to the Commission's ongoing inquiry into regulatory reform and the suspension of regulatory activity in this Docket during the Chapter 11 proceedings is not relevant to the question of what is a reasonable timeframe for processing Docket No. 2009-291 at this time. If the Chapter 11 proceedings had not been necessary, FairPoint expects that the Commission would have completed processing of Docket No. 2009-291 within a timeframe similar to that currently being proposed by FairPoint.

³ In the event the CLECs advise the Commission of their agreement with a retroactive application of the adjusted dollars at risk back to April 2011, then FairPoint would be amenable to a more extended schedule than initially proposed. Nonetheless, it simply is not necessary to extend the procedural schedule in this docket by nearly another full year given the nature of the issues.

and too much time between many of the steps to be considered to be an example of administrative efficiency.

Attached is a proposed schedule FairPoint has prepared which retains much of the structure of the Joint CLECs' schedule but contains a timeline that is more reflective of the desire to reach a decision in a timely and efficient manner. (Attachment B.) Among one of the salient features of the schedule is the holding of a number of workshops, which can be more productive and produce more efficiency if they are held jointly among the three states. Similarly, other deadlines, such as discovery and testimony deadlines, are synchronized among the states. As can be seen, FairPoint believes that a more reasonable schedule will have the cases ready for hearing by February 2012.

FairPoint believes that the establishment of such a unified schedule among the three states, with a February timeframe for hearings, will be of substantial benefit to the Northern New England regulatory agencies, the parties and FairPoint. In fact, FairPoint has attempted to develop with the Joint CLECs an agreed upon three-state schedule consolidating the dollars at risk Docket and the Simplified PAP Docket in each of Maine, New Hampshire and Vermont. While the discussions did not prove successful, FairPoint notes that it is willing to combine the dockets in the event all three NNE regulatory agencies agree upon a reasonable common time line for discovery and hearings. If FairPoint's proposed procedural schedule is adopted, FairPoint would accept the inclusion of the Dollars at Risk Docket (2009-291) in the same schedule, provided that the Commission's Order adopting the schedule provides that the PAP dollars at risk adjustment be made effective as of March 31, 2011, and that such order be conditioned on the Joint CLECs' participation in a joint motion requesting a lift of the stay of the dollars at risk proceeding in New Hampshire. It has been almost four months since this case commenced and it is likely that it will be several more months before it is concluded. There is no reason to delay a decision on these issues any further.

Finally, in accordance with FairPoint's practice of keeping the Commission apprised of significant developments in other states related to the Maine PAP dockets, and to facilitate the joint processing of the Simplified PAP dockets in the three states on a consistent schedule, FairPoint has attached to this Opposition and Response a copy of a consolidated metrics inventory spreadsheet, which was recently distributed to the CLECs in the Vermont Simplified PAP proceeding, which contains the current C2C and PAP metrics in Maine, New Hampshire and Vermont, FairPoint's proposed NNE SMP metrics, and the CLECs' proposed new metrics. (See Attachment C.) FairPoint believes that the filing of this document in Maine is particularly timely and relevant, given that the Joint CLECs' comments on the proposed metrics in the Simplified PAP case (Docket No. 2009-334), which were filed on July 1, 2011, are similar to comments filed by the Joint CLECs in Vermont.

V. CONCLUSION

For these reasons, FairPoint respectfully urges that the Commission:

- 1) deny the Joint CLECs Motion to Consolidate and Adopt Procedural Schedule;
- 2) proceed with its review of the PAP dollars at risk Docket (Docket No. 2009-291) separately from its review of the proposed SMP and WPP (Docket No. 2009-334), with Docket No. 2009-291 being processed in accordance with the schedule proposed by FairPoint on July 1, 2011, and Docket No. 2009-334 being processed in accordance with the attached schedule; or
- 3) as an alternative to (2), proceed with its review of both dockets in accordance with the attached schedule, subject to the provision that the resolution of Docket No. 2009-291 will be made retroactive to March 31, 2011 and that the Joint CLECs participate in a joint motion requesting a lift of the stay of the dollars at risk proceeding in New Hampshire.

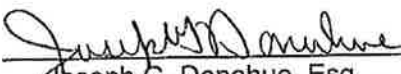

Dated at Augusta, Maine, this 15th day of July, 2011.

Respectfully submitted,

Northern New England Telephone Operations LLC

RE: DT 11-061

Dear Ms. Howland:

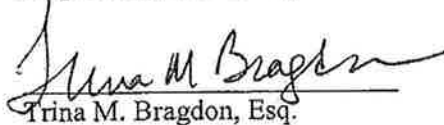

The CANNE CLECs (Freedom Ring Communications, LLC, d/b/a BayRing Communications ("BayRing"); CRC Communications of Maine, Inc. d/b/a OTT Communications ("OTT"); Biddeford Internet Corp., d/b/a Great Works Internet ("GWI"); National Mobile Communications Corp. d/b/a Sovernet Communications ("Sovernet"); Otel Telekom, Inc. ("Otel"); CTC Communications Corp., Lightship Telecom LLC, Choice One of New Hampshire Inc., and Conversent Communications of New Hampshire LLC (all d/b/a "One Communications Solutions of New Hampshire"¹) wish to provide the Commission and its Staff with copies of filings made this week at the Maine Public Utilities Commission and the Vermont Public Service Board which requested the consolidation of proceedings related to FairPoint Communications' Performance Assurance Plan (PAP) matters and included a CLEC Proposed Consolidated Schedule that the CLECs hope will get adopted in all three states if the PAP matters are consolidated. (Copies of each of the filings are attached hereto.)

The CANNE CLECs do not request that the NHPUC take any action at this time other than to monitor the outcome of the requests made in Maine and Vermont, and to the extent appropriate, coordinate with those states on any efforts to develop a consolidated 3-state schedule. If consolidation does not take place, the CANNE CLECs believe that the proper course of conduct in New Hampshire will be to move forward with the audit of the existing PAP as quickly as possible and coordinate, to the extent possible, with the other two states on matters concerning FairPoint's PAP proposal. We do not agree that the Commission's stay in DT 09-113, the so-called PAP Waiver and/or Dollars at Risk docket, should be lifted until the audit is complete and all matters regarding FairPoint's PAP proposal have been fully addressed.

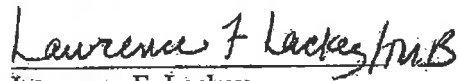

Thank you for your time regarding these matters. Please contact Trina Bragdon with any questions regarding our filings.

ATTACHMENT B**FairPoint's Proposed Consolidated Schedule¹**

Activity	Date
Develop a draft master list of current & proposed metrics	July 11, 2011
Comments on draft metrics list (confirm accuracy and completeness)	July 18, 2011
Metrics Workshop # 1 (determine which C2C & PAP metrics to include in SMP & WPP)	July 28, 2011 (9AM – 5PM)
Metrics Workshop # 2 (determine which proposed metrics to include in SMP & WPP & agree on definitions & standards for each)	July 29, 2011 (9AM – 5PM)
WPP Structure & Scoring System Workshop # 1 (FairPoint & CLECs each present proposals; begin to reach agreement)	August 10, 2011 (9AM – 5PM)
WPP Structure & Scoring System Workshop # 2 (continue reaching agreement on all aspects of plans including dollars at risk under the WPP as well as dollars at risk under the existing PAP)	August 11, 2011 (9AM – 5PM)
FairPoint Direct Testimony	September 7, 2011
Data Requests on FairPoint testimony	September 21, 2011
Responses to CLEC data requests	October 19, 2011
CLEC Direct Testimony	November 9, 2011
Data Requests on CLEC testimonies	November 16, 2011
CLEC Responses to data requests	December 14, 2011
FairPoint Rebuttal Testimony	January 4, 2012
Data Requests on Rebuttal Testimony	January 11, 2012
Data Responses	February 1, 2012
Hearings (in each state)	Feb 15, Feb 22, Feb 29, 2012

¹ This schedule does not include the four workshops related to the New Hampshire PAP audit which appeared in the Joint CLECs' proposed schedule. FairPoint believes that these proposed workshops are overkill and serve to cause delay in resolving these dockets. However, FairPoint does agree that a workshop scheduled later in the audit process may provide useful information to the regulatory agencies and the parties to the various dockets. Therefore, FairPoint recommends that any scheduling orders combining the various dockets into a single, three-state procedural schedule include a statement to the effect that any necessary workshop related to the New Hampshire PAP audit results will be worked into the schedule at a later date.

New		The captioned listing information is part of the CSR. This is asking to measure the data within the CSR, which would have to be done on a manual basis.
New		The captioned listing information is part of the CSR. This is asking to measure the data within the CSR, which would have to be done on a manual basis.
New		FairPoint has the same limitation as Verizon for complex CABS requests greater than 10,000 lines. For all government accounts we require a written LOA on government letter head prior to providing the CSI. This is standard process.
New		FairPoint assumes this is CLEC cabs information. This is handled manually via the manual CSR request process.
New		This is a cutover issue that is being resolved manually as information is found. The same issue exists for all Retail accounts.
New		Assume that this is related to the Wholesale Customers requesting their own CSR's. The information is only as good as what was received from VZ. CLECs should be able to look at their own contract copies.

FairPoint
Consolidated Metrics Inventory
(As of July 11, 2011)

New		Is this a one time manual measure of entire database to determine possible remaining conversion issues? Please define numerator, denominator and possible source of data. This is related to conversion data; is happening much less with data clean up initiative
New		Internal record service orders are often created, but the solution may vary depending on the nature of the inventory issue. If dispatch is required for inventory information will take up to 72 hours. Conversion issue.
Retain		WPTS is not a FairPoint System. Functionality is handled on a manual basis. Low volume area does not require this level of automation.
Retain	Agree Keep	
Delete	Agree Delete	
Retain		FairPoint does not offer EB. The Act does not require it. Sufficient access to reporting trouble exists.
Retain	Agree Keep	Comcast listed product code 6050 (Accept). This is also WEBGUI. Should be same metric.
Retain		WPTS is not a FairPoint System. Functionality is handled on a manual basis. Low volume area does not require this level of automation.

Retain & Adds new metric		QSI: <u>% Accurate line loss report sent/ made available within 1 business day of order completion.</u> Why propose a different metric than already exists with a 2 business day standard?

FairPoint
Consolidated Metrics Inventory
(As of July 11, 2011)

New		(QSI) <u>% Accurate LVR listings (Total LVR listings minus reported errors as % of total CLEC LVR listings).</u> This metric exists in Rhode Island and was created prior to spin off of Directory company. Data for total listings must be provided by Listing provider. Verizon has agreement to get this data for RI, FairPoint does not have this information.
Retain		There is no large job or batch hot cut process at FairPoint. All hot cuts are counted together in a single metric. The VZ metric anticipated large volume hot cuts from UNE P conversions.
New		Do not understand this metric. Manual orders are captured in OR-1 & OR-2 metrics
New		Do not fully understand the metric. Would there be a standard? Wouldn't source of data be additional manual data?
New		It is very common for carriers to place multiple DL orders into the VFO. Many times the listing has been disconnected on a previous PON.
New		This was just fixed with the June release and the final phase of the fix is in the August release. The Reps now have the ability to respond back on the correct version of the PON using the JSP tool.
Retain		QSI proposes for the WPP. Products have fixed standard intervals and therefore always the same. Verizon had floating intervals.
Retain		QSI proposes for the WPP. Products have fixed standard intervals and therefore always the same. Verizon had floating intervals.

Retain		Invoice Accuracy. How is this different than existing metric, designed to measure invoice accuracy?
New		Is this a measure of retail lines? Isn't a final bill provided after disconnect? Reason for disconnects are not tracked, making this impossible to measure. Effective billing date is utilized for original disconnect date, if bill is delayed.
New		Do not understand this metric. Please provide numerator, denominator and suggested source of information. Is this a retail bill or a wholesale bill.
New		Do not understand this metric. Please provide numerator, denominator and suggested source of information.
New		This would require manual reporting by CLECs to identify. Manual metric.
