Re: Tilton Northfield Water District DW05-135

Dear Madam:

Pursuant to the order issued in the above-mentioned case, please accept this correspondence to fulfill the District's requirements or instructions to provide geographical locations of the existing district, discuss rates and provide water service extension provisions.

Please find the enclosed map which depicts the termination of present service numbered 1-13 with locations in addition to other minor stubs to existing users in the Towns of Tilton and Northfield. Please note this is only a portion of our franchise area within the two communities.

The District will offer existing approved tariff rates to any extension customers. The District extension policy will remain as has been utilized by the Aqueduct Company, Inc. Desired extensions shall be at developer's expense, including engineering, as determined and approved by the District

Commissioners. Any District proposed extension shall be budgeted and voted upon by District voters.

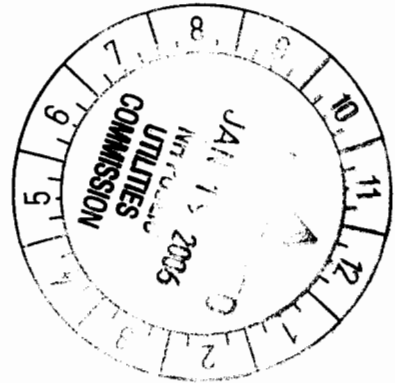

Extensions outside the current District shall be either under RSA 52:5, Changing District Boundaries or compliant with RSA 362:4.

Sincerely,

Peter G. Russell
Partner
