

Verizon New England Inc.  
d/b/a Verizon

State of New Hampshire

Docket No. DT 07-011

Respondent: Stephen E. Smith  
Title: Vice President – Business  
Development

**REQUEST:** New England Cable and Telecommunications Association, Inc. and  
Comcast Phone of New Hampshire, Group I, Set #1

**DATED:** April 6, 2007

**ITEM:** Please identify what conduit inventory, route information, capacity,  
NECTA/CPNH, occupancy, billing, plant records, mapping and plant condition  
GI 1-16 information has been and/or will be provided by Verizon to FairPoint,  
and state when such information will be so provided.

**REPLY:** Verizon will provide all original paper and all then-existing scanned  
copies of New Hampshire conduit licenses and supporting  
documentation. For example, results of surveys specifying the manhole  
route(s) and letters issued by Verizon pertaining to manhole surveys, rod,  
rope, and slug activity, and inner-duct placement activity, will be  
transferred to FairPoint at the time of the close. Supporting  
documentation may also include conduit condition information such as  
correspondences related to duct blockages or manhole breakouts. Details  
including specific manhole locations, manhole numbers, and conduits  
occupied are part of the conduit licenses. All billing information  
pertaining to New Hampshire conduit occupancies will be provided to  
FairPoint after the close as part of the transition services. In addition to  
paper copies of all New Hampshire conduit occupancy customer bills, an  
extract from the billing system listing all customer billing information,  
including information such as customer name, billing address, full and/or  
partial duct footages, location (municipality), license numbers, and  
billing amount, will be provided to FairPoint after the close as part of the  
transition services.
