**Subject:** re: Lakes Region Water Co -

Hello

I am a rate paying customer of Lakes Region Water Co. I received a petition for them to increase our rates again. I know it might be past the deadline to voice my concern about this but I thought I'd try. I do not know who to send this to within the PUC. Obviously I would not be in favor of allowing this company such a tremendous increase in rates. I complain to them all the time about their exorbitant rates. People tell me to put in a well and I would but I don't have the money for that either. They have already received SO MANY rate increases over the years. Enough is enough. This bill is already very very high and I am highly conservative with my water usage. My main question is when does it stop?
