Re: DE 16-576 Net Metering

Dear Ms. Howland,

Thank you to the NH PUC for inviting public comment on DE 16-576.

I offer my comments as a consumer, chair of my local Energy Commission, and a retired electrical engineer.

Although I do not wish to file as an intervener, I would like to be added to the Service List and to comment and follow the procedure as an Eversource customer.

I'm also participating in the Grid Modernization Workgroup for IR 15-296. Properly pricing and paying for Distributed Generation is one of the focuses of the work being done in that docket. Since there is some probability that future rate design may include time varying rates, please consider that in your rate proposals.

I support the comments from the combined members of environmental and renewable energy suppliers on 5/19/2016.

In summary, I applaud the Legislature and the PUC for opening this docket. I look forward to participating in the docket as a consumer and appreciate the welcoming attitude of the PUC in inviting public participation.

Sincerely,

A handwritten signature in cursive script that reads "Patricia A. Martin".
