Subject: Please Support Rooftop Solar in NH

Hello,

I'm writing to urge you to support rooftop solar and net metering in New Hampshire. Net metering benefits all electric customers - not just the individual providers - while keeping us moving toward a clean energy future.

In a state facing pipelines and high-voltage transmission lines, we should not close off a growing and increasingly critical supply of clean energy for the state. If anything, we should raise or remove the cap for net metering altogether. We cannot afford to continue investing in fossil fuels - solar and wind should be given a priority to ensure a sustainable and clean energy future.

Thank you for your consideration.

Happy trails,

Bill Cobb
