Date: 1/29/2020

Subject: Londonderry Distribution System Analysis

The following Technical Memorandum summarizes Underwood Engineers' (UE) analysis of the Londonderry Core Distribution System in accordance with Engineering Service Request #1 and Amendment #1. This analysis shall supplement UE's letter titled "Preliminary Evaluation of PEU's Distribution System Londonderry, NH" dated October 18<sup>th</sup>, 2019.

#### 1. INTRODUCTION

The Londonderry Core Distribution System (hereinafter the "System" or "Londonderry System") is owned and operated by the regulated public utility, Pennichuck East Utility, Inc (PEU). PEU has engaged Underwood Engineers to evaluate the System's current and future demand and available capacity at key locations. This analysis serves as the basis for the need for improvements including water storage in the System.

#### 2. BACKGROUND & EXISTING CONDITIONS

The key assets within the System include the Cohas meter pit, the Mountain Homes booster pump station, the Gilcrest Road pressure reducing valve structure (the "PRV"), and the South Road booster pump station. Figure 1 provides an overview map of the System. The figure identifies the various pressure zones, the size of the water mains, and the locations of the assets referenced above. The System does not currently contain water storage.

In its current state, the System can be fed by two different connection points. Under normal operating conditions, the System's flow is supplied by a connection to Manchester Water Work's (MWW) distribution system near the intersection of Mammoth Road (Route 128) and Rockingham Road (Route 28). The MWW system contains five (5) million gallons of water storage in Londonderry; however, supply into the System is limited by a Purchase Water Agreement between PEU and MWW. This Purchase Water Agreement limits PEU's water usage to an Average Daily Flow (ADF) of 2.1 million gallons per day (gpd) or 1,458

gallons per minute (gpm) and a Maximum Daily Flow (MDF) or 3.5 MGD or 2,430 gpm. Because the System does not have water storage to buffer peak flows, PEU is paying an increased water rate to MWW in order to be able withdraw higher flows from MWW's distribution system. Further, MWW is only required to provide PEU a fire flow rate of 750 gpm. This connection is metered at the Cohas meter pit. The second connection to the System is an emergency connection to the Derry distribution system. This emergency connection is intended to provide additional fire flow capacity for the Home Depot off of Route 102. PEU reported that, through an agreement with a developer, PEU is obligated to provide an available fire flow of 2,500 gpm to Home Depot.

The Mountain Homes booster pump station has four pumps with a total design pumping capacity of 2,400 gpm. The two larger pumps each have a pumping capacity of 900 gpm at a total dynamic head of 235 feet. The two smaller pumps each have a pumping capacity of 300 gpm, each at a total dynamic head of 215 feet. See Appendix D for Mountain Home pump curves. This pump station operates on system pressure and the controls are set to maintain a discharge pressure of 106 pounds per square inch (psi). See Appendix E for Mountain Homes pump station functional description.

The South Road booster pump station contains two pumps with a total pumping capacity of 1,300 gpm, although the pump station controls are set to limit the flow to 1,250 gpm. Each pump has a pumping capacity of 650 gpm at a total dynamic head of 200 feet. See Appendix F for South Road pump curves. This pump station also operates based on system pressure and the controls are set to maintain a discharge pressure of 110 psi. See Appendix G for South Road pump station functional description.

The System contains four different pressure zones which are identified on Figure 1. The actual observed static grade line of the pressure zones is noted in Section 4 of this report. The 620 and 498 pressure zones comprise the majority of the system and are the focus of this analysis. The pressure zones are as follows:

- The 480 ft Mean Sea Level (MSL) pressure zone (480 zone) extends between the MWW connection and the Mountain Homes booster pump station. This pressure zone is fed by the MWW connection and serves northern Londonderry. The hydraulic grade line (HGL) of this pressure zone is set by the water surface level of MWW's water storage tanks. The overflow of the MWW storage tank is at EL 480.5 ft MSL.
- The 620 ft MSL pressure zone (620 zone) operates on the highest HGL and extends between the Mountain Homes booster pump station and the Gilcrest Road PRV structure. This zone is fed solely by the 480 zone and serves central Londonderry. The HGL of this pressure zone is maintained by the Mountain Homes booster pump station.

- The 498 ft MSL pressure zone (498 zone) begins downstream of the Gilcrest PRV structure and serves southern Londonderry, primarily the commercial businesses along Route 102. The 498 pressure zone is normally fed by the 620 zone, through the Gilcrest Road PRV, but does contain that emergency connection with Derry which allows for high flow capacity. The Derry connection is located off of Kendell Pond Road and feeds the suction line of the South Road booster pump station.
- The 540 ft MSL pressure zone (540 zone) is fed by the 620 zone and provides water to a small subdivision. This zone requires a pressure reducing valve to limit water pressure because of the elevation of the services within the zone. This pressure zone is considered incidental in relation to the entire Londonderry System.

The Gilcrest Road pressure reducing valve structure consists of three different pressure reducing valves that open in succession based on the downstream pressure. The pressure set points for the pressure reducing valves are as follows:

- 2" PRV set to maintain a downstream pressure of 64 psi
- 4" PRV set to maintain a downstream pressure of 60 psi
- 8" PRV set to maintain a downstream pressure of 56 psi

The PRV structure contains an emergency close feature to prevent over-pressurizing the 498 zone. This emergency feature closes if the downstream pressure of the valve in the 498 zone exceeds 100 psi.

The known issues in the System are as follows:

- The System does not contain water storage; thus, all system demand must be met by pumping capacity.
- The 480 pressure zone contains approximately one mile of eight inch water main that causes a large amount of head loss at higher flow rates which in turn lowers the HGL and ultimately limits flow into the 540 and 620 pressure zones.
- There is only one connection point to feed the 480, 620, and 540 pressure zones.
- The majority of System is linear. Only small portions of the System have pipe loops, which provide redundancy.
- The Gilcrest Road PRV structure is in poor condition and frequently enters emergency shutdown mode unexpectedly. When the PRV structure is in an emergency shutdown mode, the 498 zone can only be fed by the emergency connection to Derry. PEU has noted that funding has been allocated in their capital budget to replace this structure in the year 2020 or 2021.

#### 3. SYSTEM DEMAND

Appendix A contains hourly flow data from the Cohas meter pit and Appendix C contains monthly flow data. Flow data was provided to UE by PEU and was used to determine the ADF, MDF, and the Peak Hour Flow (PHF) in the distribution system. The system demand flow rates are summarized below in Table 1.

ADF (Note 1)		MDF (Note 2)	PHF (Note 3)
Gal/Month	10,945,451	15,560,490.00	N/A
Gal/Day	353,079	518,683.00	1,624,320.00
MGD	0.35	0.52	1.62
gpm	245	360	1,128
Peak Factor	1.0	1.47	4.60

Table 1: Londonderry Core System Demand

#### Notes:

- 1. ADF was calculated based on the average monthly flow divided by 30 days, see Appendix C.
  - o Data Period: January 2015 to December 2015
- 2. MDF was calculated based on the highest monthly flow divided by the number of days in that month, see Appendix C.
  - o Data Period: January 2015 to December 2015
  - o The maximum monthly demand occurred on September 2015.
  - MDF was calculated by dividing the month with the highest demand by the number of days in that month. Since the calculated MDF is an average day flow of the month with the highest monthly demand, the MDF and peak factor are slightly less than the actual MDF.
- 3. Peak hourly flow was observed on June 18th, 2018, see Appendix B.
  - o Data Period: 5/26/18 to 8/30/18

The period of the flow data provided to UE was limited. System demand flows could be further refined if three years of flow data is provided. The calculated MDF peaking factor is consistent with expected peaking factors noted in AWWA M32 Distribution Network Analysis for Water Utilities. The calculated PHF peaking factor is high but reasonable considering the small size of the System.

PEU has noted that the future Woodmont Commons Development is expected to increase system max day demand by 549,996 gpd or 382 gpm. Additionally, future customer growth in Londonderry is expected to increase by 121,553 gpd or 84 gpm. This results in a future MDF of 1,190,231 gpm or 827 gpm.

#### 4. FIELD TESTING

On November 26<sup>th</sup> and 27<sup>th</sup> of 2019, UE and PEU performed three flow tests at key locations throughout the Londonderry System. These tests were performed to further define the available flow capacity in the 620 and 498 pressure zones. Appendix A contains the flow test procedures, locations of the flow tests, and the field data. Hydrant flow calculations were performed by PEU using PEU procedures and equipment. The flow tests were performed between 12:08 AM and 1:28 AM when demand was at its lowest. A base flow of approximately 40 gpm existed in the system. Below is a summary of each flow test:

#### Flow Tests #1 – Londonderry Highschool (620 Zone)

- Flow
  - o Mountain Homes Flow Meter = 1,620 to 1,651 gpm
  - o Calculated Hydrant Flow = 1,678 gpm

#### Pressure

- o 7 psi (HGL of 386 ft) was observed at the Mountain Homes pump station suction piping pressure gauge.
- o 47 psi (HGL of 479 ft) was observed at the Moutain Homes pump station discharge piping pressure gauge.
- o Pressure at the highest service (El 490) in the 620 zone was zero or slightly negative.

#### Flow Tests #2 – Gilcrest Road (620 Zone)

- Flow
  - o Mountain Homes PS Flow Meter = 1,580 to 1,620 gpm
  - o Calculated Hydrant Flow = 1,562 to 1,592 gpm

#### Pressure

- 7 psi (HGL of 386 ft) was observed at the Mountain Homes pump station suction piping pressure gauge.
- o 52 psi (HGL of 490 ft) was observed at the Mountain Homes pump station discharge piping pressure gauge.
- o Pressure at the highest service (El 490) in the 620 zone was zero or slightly negative.

#### Flow Tests #3 – Home Depot (498 Zone)

- Flow
  - o Mountain Homes Flow Meter = 1,270 to 1,570 gpm
  - O South Road pump station\* = 632 to 852 gpm
  - o Calculated Hydrant Flow = 2,122 to 2,166 gpm

\* The flow meter at the South Road pump station appears to be faulty. Flow at the South Road pump station was calculated by subtracting the flow meter reading from the Mountain Homes booster pump station from the calculated hydrant flow.

#### Pressure

- 20 psi (HGL of 416 ft) was observed at the Mountain Homes pump station suction piping pressure gauge.
- o 105 psi (HGL of 613 ft) was observed at the Mountain Homes pump station discharge piping pressure gauge.
- o Pressure at the highest service (El 490) remained above 50 psi (HGL of 600).

Below is the observed static head of the pressure zones based on field data obtained during the flow tests:

- 480 zone = 476 ft MSL
- 620 zone = 613 ft MSL
- 498 zone = 513 ft MSL

#### 5. DISCUSSION

Below is a list of observations that were noted during the flow tests:

- Flow test #2 yielded similar results to flow test #1.
- In general, the pressure throughout the System remained above 20 psi during flow test #3.
- The System never achieved steady state during flow test #3. This is apparent based on the pressure transducer data from location 4 which can be found in Appendix A. This was due to the Gilcrest Road PRV opening in sequence as the pressure in the 498 zone fell and the South Road pump station being called to service to maintain system pressure.
- During flow tests #1 and #2 the suction pressure at the Mountain Homes pump station fell below 12 psi, which is approximately a 90-foot drop in HGL between the Cohas meter pit and the Mountain Homes pump station. The Mountain Homes pump station is designed to maintain a discharge pressure of 93 psi at flows greater than 1,250 gpm but the discharge pressure was observed to be approximately 45 psi during both tests. The Mountain Homes pump station SCADA programing contains a control setting that slows down the speed of the pump with a VFD if the suction pressure falls below 12 psi in order to regain suction pressure. See Appendix E for Mountain Homes pump station functional description. Although the discharge pressure appeared to be limited, flows of approximately 1,600 gpm were still observed. Further investigation may be needed to confirm the discharge pressure was limited due to SCADA programming. The Mountain Homes pump station does not contain a flow control, pressure relief, or pressure sustaining valve.

- During flow test #3 the suction pressure at the Mountain Homes pump station never fell below 12 psi and the discharge pressure ranged between 98 to 116 psi. The observed discharge pressures were the intended discharge pressure for this station.
- During both flow tests #1 and #2 a pump was called to service at the South Road pump station which indicates that the 620 zone was no longer meeting the demand of the 498 zone.
- The Gilcrest Road PRV structure went into emergency shut down mode during flow test #3. Location 6A was the next hydrant upstream of the flow test. Shortly after the hydrant was closed (minute 12), a pressure of 118 psi was observed at location 6A. This pressure spike is assumed to coincide with the PRV structure entering into emergency shut down mode.
- The flow meter at the South Road pump station appears to be faulty as the flow meter indicated that 24,688 gpm was pumped through the station during minute 8 of flow test #3 which greatly exceed the capacity of the pump station.

Figure 2 summarizes the hydraulic grade line of the distribution system during each flow test. The hydraulic grade line did not diminish due to friction or minor losses in the 620 and 498 pressure zone. This indicates that the distribution mains are adequality sized and not limiting capacity in these two pressure zones. The primary issue is the limited pumping capacity and the stretch of 8" main in the 480 pressure zone that significantly lowers the HGL.

Flows observed during flow tests #1 and #2 in the 620 zone were both approximately 1,600 gpm, although system pressure fell close to zero psi in two locations. Flow observed during flow test #3 at the Mountain Homes pump station was approximately 1,400 gpm and flow at the South Road pump station was approximately 700 gpm for a combined flow of 2,100 gpm. Because pressures generally remained above 20 psi throughout the entire System during flow test #3 we believe that flow test #3 is most representative of the available capacity of the System based on the current operating configurations. Below is a summary of available capacity in the 620 zone and the 498 zone:

- Available flow capacity in the 620 zone is approximately **1,400 gpm**.
- Available flow capacity in the 498 zone is approximately **2,100 gpm.**

#### 6. CONCLUSION

The New Hampshire Department of Environmental Services (NHDES) follows the Recommended Standards for Water Works, commonly referred to as the "Ten State Standards." Under Section 6.3 (Pumps) and Section 8.2 (System Design) of the Ten State Standards, the Londonderry Core Distribution System must be able to meet both the maximum domestic demand and fire flows simultaneously and the maximum domestic demand with the largest pump out of service.

Our analysis concludes that the current Londonderry System cannot meet the required fire flows for Home Depot even at times of low or zero demand. Arguably, the theoretical pumping capacity of the Mountain Homes pump station, with the largest pump of service, can meet the maximum domestic demand. However, in reality the Mountain Homes pump station may not be able to meet maximum domestic demand due to hydraulic restrictions associated with the section of 8 inch main. Further, please note that all four pumps were called to service during the flow tests. The available flow with the largest pump out of service will be less than the available flow capacity summarized in Section 5 of this report. Additional field studies or water modeling should be performed to determine if the System can meet the maximum domestic demand with the largest pump out of service. Alternatively, other options could be considered that would have the additional advantage of providing redundancy.

The following improvements could be implemented to achieve the NHDES flow requirements noted above:

#### Elevated Storage

- O Because average day flows are substantially less than the available pumping capacity, water storage can be sized and located at an elevation to meet maximum domestic demand and fire flows. Water storage will provide resiliency to the system as it will act as another source of water supply should a failure occur in the mostly linear system. Additionally, if storage is provided, PEU can reduce the available water usage limits in the Purchase Water Agreement with MWW which will reduce water rates for users. The section of water main that acts as a bottle neck would not need to be replaced with larger diameter pipe.
- Ground Level Storage and Pumping
  - o Ground level storage and pumping provides similar benefits to elevated storage but at a higher capital and operation and maintenance costs, and with less system reliability because there are more single points of failure.
- Increase Water Main Size and Pumping Capacity

o Larger water main can be constructed to eliminate the bottle neck along with pumping upgrades at the Mountain Homes pump station. This alternative will not be able to reduce available water usage limits in the Purchase Water Agreement with MWW. This option presents the highest capital cost and the least system resiliency as it contains the most single points of failure.

Underwood Engineers recommends constructing an elevated storage tank because this option provides the most system resiliency and reliability at the lowest cost while maintaining acceptable system pressure. Please note that in the Fall of 2019 PEU applied for a height variance to construct an elevated water storage tank and the Londonderry Zoning Board denied their request. PEU is currently investigating alternative system improvements that will meet the NHDES flow requirements and allow for future demand. As a follow-up to this analysis, UE will be performing additional studies to confirm the basis of design for the system improvements that PEU wishes to proceed with.

Please call if you have any questions.

Very truly yours,

## APPENDIX A

# UNDERWOOD ENGINEERS' FLOW TEST NOVEMBER 26, 2019

#### **Londonderry Distribution Analysis - Flow Test Protocol REV 2**

Job No: 2421

Date: 11/26/19

Purpose: The proposed field work is to calibrate the Londonderry distribution water model.

- Flow Test 1 Determine available capacity at high school in 620 pressure zone.
- Flow Test 2 -Determine available capacity for Future Woodmont commons in 620 pressure zone.
- Flow Test 3 Determine available capacity at Home Depot in 498 pressure zone.

#### **Equipment:**

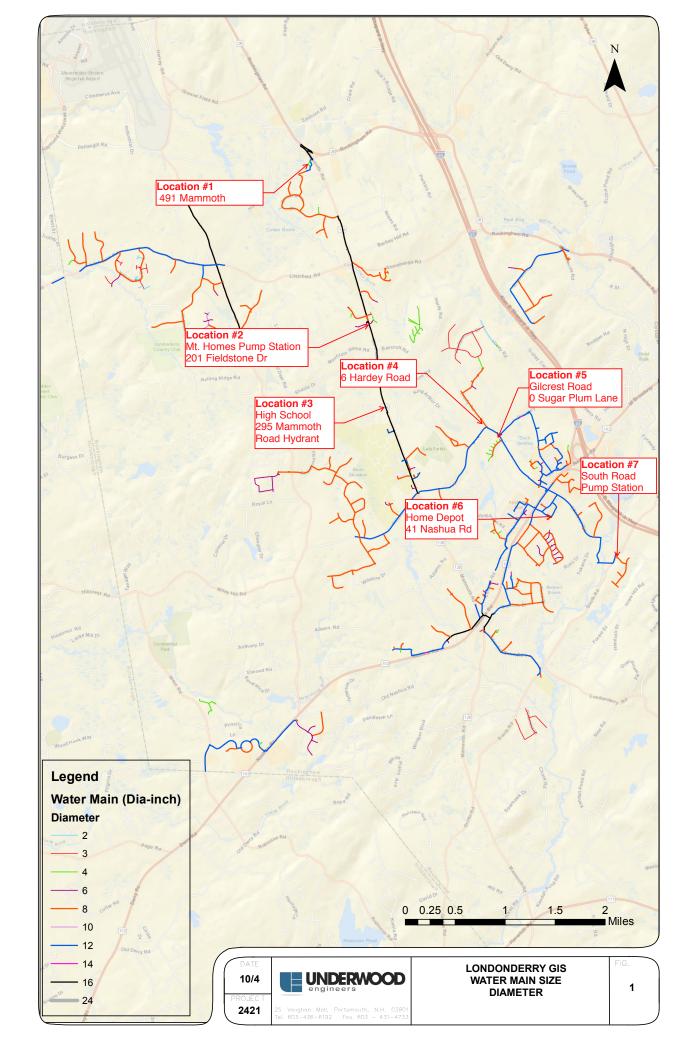

- Required Staff = 7 Min
  - Traveling Flow Test Team (2 MIN)
    - Hydrant Operator
    - Log pitot pressure or flow
  - Stationary Location #2 Mountain Homes Pump Station (1 MIN)
    - Log flow and suction and discharge pressure
  - Stationary Location #3 High School (1 MIN)
    - Log Pressure
  - Stationary Location #5 Gilcrest Road (1 MIN)
    - Log Pressure
  - Stationary Location #6 Home Depot (1 MIN)
    - Log Pressure
  - Stationary Location #7 South Road Pump Station (1 MIN)
    - Log flow and suction and discharge pressure
- (1) 4.5" Hydrant diffuser
- (5) Hydrant Pressure gauge
  - o (2) digital hydrant pressure recorders provide by UE
  - o (3) hydrant pressure gauges

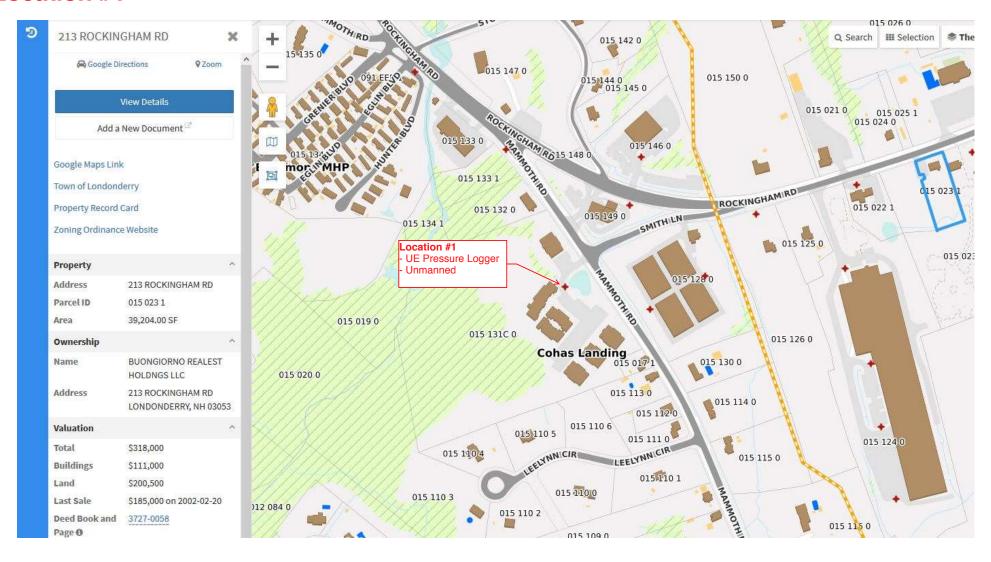

#### **Procedure:**

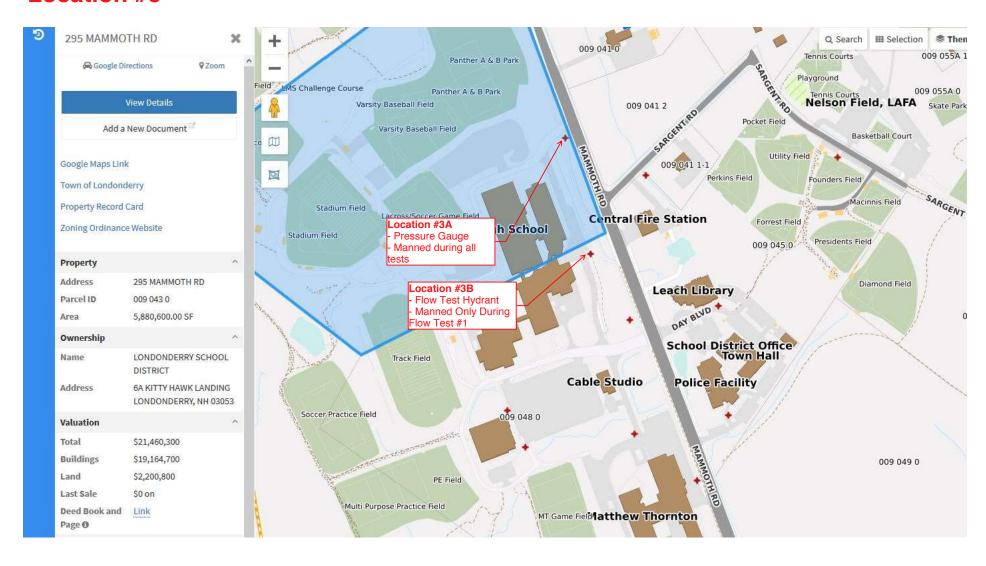

- Flush Hydrant prior to installing gauges
- Let system calibrate before starting flow test
- Record data on 1 min intervals
- Start logging 5 mins before flow test, 5 min during flow test and 5 mins after flow test (15 mins total)
- Bleed hydrants after all flow tests to discharge turbid water

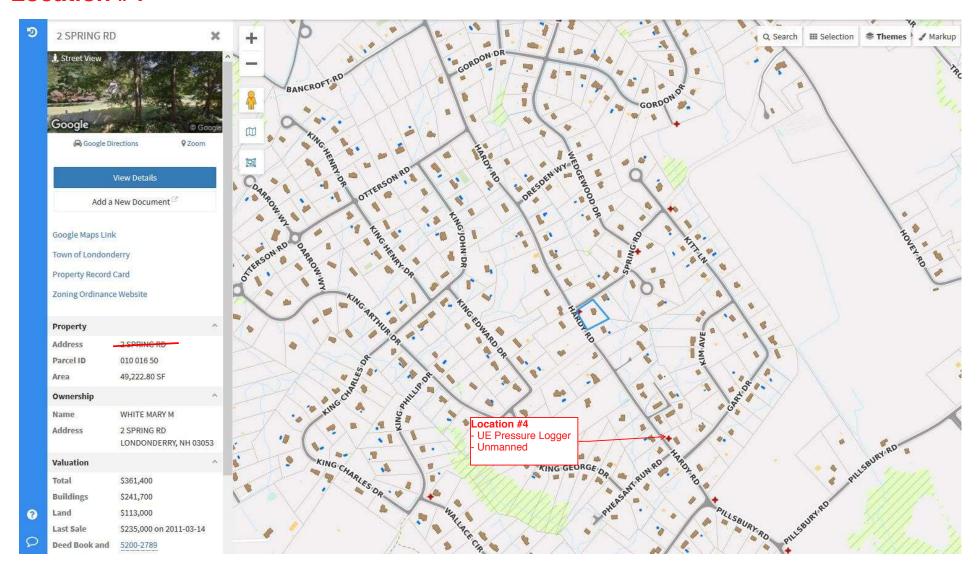

#### **Communication & Coordination**

- Meeting Location: 201 Fieldstone Dr, Londonderry, NH 03053
  - o Mt. Homes Pump Station
- Meeting Time: 10 PM
  Dial-in #: 1-844-375-6211
  Conference Code: 2144375362

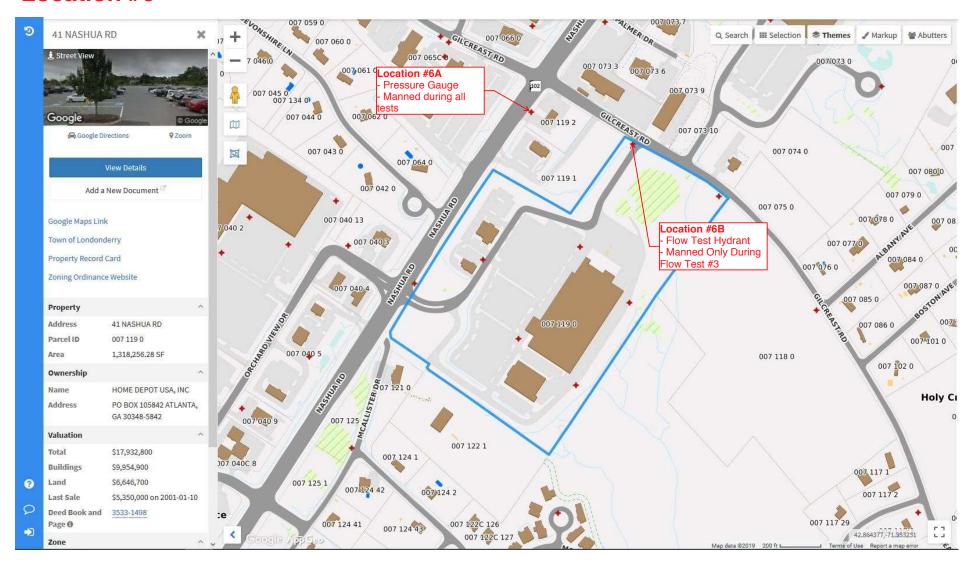

**Test #**: 1, 2 & 3

Location #: 3, 5 & 6

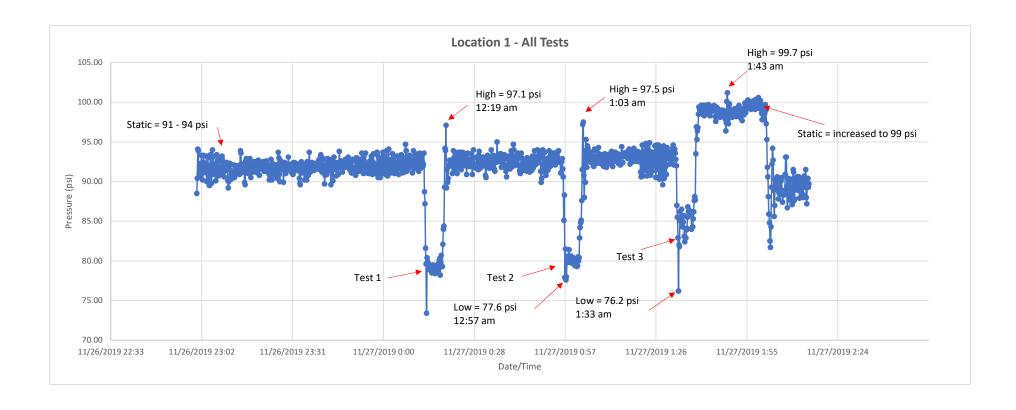

Name: Eric Levesque PWW & Devon Smith UE

**Date:** 11/27/19

**Diffuser Diameter:** 4.04", the same diffuser was used for all flow tests.

MOUNTAIN HOME ESTATES PUMP STATION

PACO Pumps is pleased to offer for your consideration on this project the following equipment:

#### Quantity (2), Model 25957 w/ 30 HP Motor, (300 GPM @ 215' TDH)

- Horizontal Single Stage Flexibly Coupled End Suction Pump, Type LF, Product Code 11
- Pump has 125# ANSI flanges/cast iron casing/bronze impeller/bronze case wear ring/steel shaft/bronze sleeve/Buna-Ni-Resist mechanical seal/manual valves mounted on suction & discharge of each pump/6L bearing frame/sealed for life bearings
- Motor is horizontal/3500 RPM/230-460 V/3 Phase/60 Hz/Premium Efficiency (suitable for use w/ VFD)/ODP
- · Pump & Motor mounted on steel base with coupling & coupling guard

#### Quantity (2), Model 40959 w/ 75 HP Motor, (900 GPM @ 235' TDH)

- Horizontal Single Stage Flexibly Coupled End Suction Pump, Type LF, Product Code 11
- Pump has 125# ANSI flanges/cast iron casing/bronze impeller/bronze case wear ring/steel shaft/bronze sleeve/Buna-Ni-Resist mechanical seal/manual valves mounted on suction & discharge of each pump/6L bearing frame/sealed for life bearings
- Motor is horizontal/3500 RPM/230-460 V/3 Phase/60 Hz/Premium Efficiency (suitable for use w/ VFD)/ODP
- Pump & Motor mounted on steel base with coupling & coupling guard

Respectfully yours,

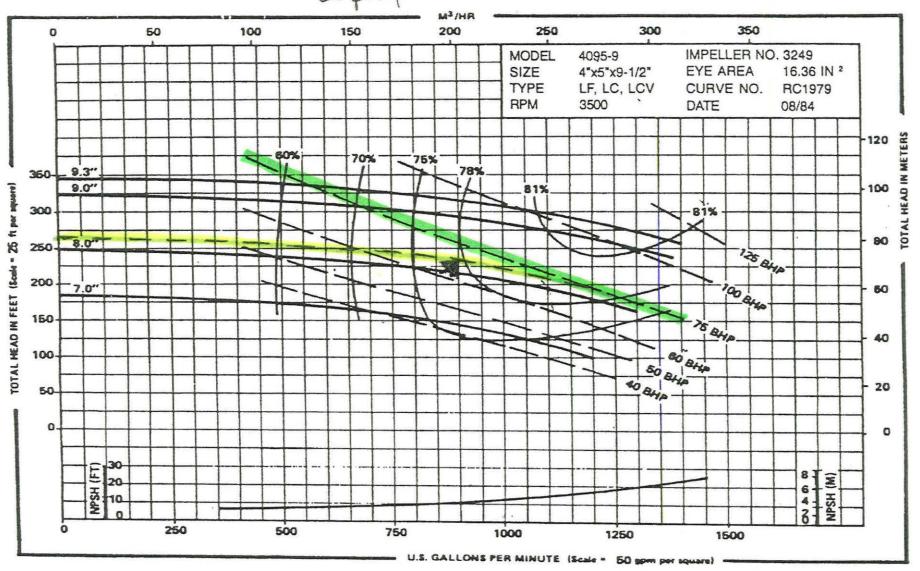

Jennifer Lee

Municipal Project Administrator

Bergan wolly.

## APPENDIX E

# MOUNTAIN HOME ESTATES SCADA

### Mountain Home Estates Pumping Station SCADA Narrative

Revised October 6, 2004

The Mountain Home Estates pumps will be controlled through HAND/OFF/REMOTE switches at the pumping station.

In the HAND position, the pumps will be run exclusive of the SCADA control.

In the REMOTE position, the pumps will be controlled from the SCADA interface.

The SCADA interface shall provide for an AUTO/OFF selection of each pump from the SCADA interface. In the OFF position, the pump will not run unless it is turned to the HAND position with the HOR at the station itself.

In the AUTO position, the pump will be controlled by the SCADA logic as specified below:

There will be a LEAD/LAG/LAG-LAG/FIRE selector at the SCADA interface. The pumps will operate as follows:

#### Lead Pump - VFD Controlled

Runs at all times to maintain a pressure of **106 psi**. The Lead pump will alternate leading with the Lag pump.

#### Lag pump – VFD Controlled.

Runs to maintain a pressure of 106 psi.

**Turns on** when flow out of the Mountain Home Estates Pumping increases to **375 gpm** for at least **2 seconds** or the pressure drops to **101 psi** for at least **12 seconds**.

**Turns off** when the flow out of the Mountain Home Estates Booster drops to **350 gpm** for at least **60 seconds**. Minimum pump run time shall be 2 minutes

#### Lag-Lag pump - VFD Controlled.

Runs to maintain a pressure of 106 psi.

**Turns on** when flow out of the Mountain Home Estates Booster increases to **750 gpm** for at least **5 seconds** or the pressure drops to **98 psi** for at least **15 seconds**.

**Turns off** when the flow out of the Mountain Home Estates Booster drops to **600 gpm** for at least **60** seconds. Minimum pump run time shall be 2 minutes

#### FIRE pump - VFD Controlled

Runs to maintain a pressure of 106 psi

**Turns on** when the flow out of the Mountain Home Estates Booster increases to **1250 gpm** for at least **10 seconds** or the pressure drops to **93 psi** for at least **20 seconds after the fire pump turns on**.

**Turns off** when the flow out of the Mountain Home Estates Booster drops to **1000 gpm** for at least **90 seconds** Minimum pump run time shall be 2 minutes.

A Low Discharge pressure alarm will occur if the station pressure falls below **90 psi for more than 45 seconds.** 

A Low Low Discharge pressure alarm will occur if the station pressure falls below **80 psi for more than 60 seconds.** 

A High Discharge pressure alarm will occur if the station pressure exceeds **120 psi for more** than **60 seconds**.

A Low Suction pressure alarm will occur if the station pressure falls below **20 psi for more than 30 seconds.** 

A Low Low Suction pressure alarm will occur if the station pressure falls below 12 psi for more than 10 seconds. The low low suction pressure alarm will cause the VFD speed controller to adjust the pump speed so that the suction pressure will not drop below 15 psi. In the event that the suction pressure drops below 5 psi for more than 60 seconds than the station pumps will shut down and will need to be manually reset at the station.

All pressure alarms will be operator selectable.

A loss of phase alarm will result in an alarm and will lock out the pumps until they are reset with the reset button at the SCADA interface.

If a pump is called to run and it fails to run then a pump fail alarm shall occur. If it is the lead pump which fails to run the lag pump will automatically become the lead pump and operate at the preset parameters for the lead pump. If a pump is turned off with its local HOA switch the pumps following that pump in the pump sequencing shall automatically move up one pump position and shall operate with the parameters of the new pump position.

Pump run times will be recorded on the SCADA pump run screen.

Real time Flow rate will be visible on the SCADA screen.

Suction and Discharge Pressures will be visible on the SCADA screen.

There will be a loss of radio alarm for this station. The radio will be provided with battery back up.

This station will also have alarms for intrusion, high and low building temperature and power failure.

All lead and lag start and stop flow settings setting will be adjustable from the SCADA interface.

Historical trending shall be available as follows:

a. Suction Pressure, Discharge Pressure, pump speeds and Flow rate.

Pump "On" Operational Settings - Flow

# APPENDIX G SOUTH ROAD SCADA

#### South Road Booster Station SCADA Narrative Revised April 3, 2002

The South Road booster pumps will be controlled through HAND/OFF/REMOTE switches at the pumping station.

In the HAND position, the pumps will be run exclusive of the SCADA control.

In the REMOTE position, the pumps will be controlled from the SCADA interface.

The SCADA interface shall provide for an AUTO/OFF selection of each pump from the SCADA interface. In the OFF position, the pump will not run unless it is turned to the HAND position with the HOR at the station itself.

In the AUTO position, the pump will be controlled by the SCADA logic as specified below:

There will be a LEAD/LAG selector at the SCADA interface. The pumps will operate as follows:

#### Lead Pump – VFD controlled

Runs once a week on **Monday** morning @ **8:00 a.m.** for 30 minutes. Runs to maintain a pressure of **126 psi**.

At all other times this pump runs to maintain a pressure of **110 psi** when the pressure at South Road Station drops to **105 psi** for at least 5 seconds.

Shuts down when pressure increases to **114 psi** for at least 2 minutes

Minimum pump run time shall be 2 minutes Minimum pump off time of 2 minutes.

#### Lag pump – VFD controlled

Runs once a week on **Tuesday** morning @ **8:00** a.m. for 30 minutes. Runs to maintain a pressure of **126** psi.

At all other times this pump runs to maintain a pressure of **110 psi** when the pressure at South Road Station drops to **102 psi** for at least 5 seconds.

Shuts down when pressure increases to **114 psi** for at least 2 minutes

Minimum pump run time shall be 2 minutes

The Chlorine Feed in the station shall be paced to flowrate.

The flow out of the station shall be limited to **1250 gpm**. When the flow out of the station reaches **1250 gpm** the pump speed shall be reduced in order to limit the flow out of the station to **1250 gpm**.

A Low Discharge pressure alarm will occur if the station pressure falls below **100 psi for more than 60 seconds**.

A Low Low Discharge pressure alarm will occur if the station pressure falls below **90 psi** for more than **60 seconds**.

A High Discharge pressure alarm will occur if the station pressure exceeds 135 psi.

A Low Suction pressure alarm will occur if the station pressure falls below **65 psi for more than 60 seconds**.

A Low Low Suction pressure alarm will occur if the station pressure falls below **15 psi for more than 20 seconds.** The low low pressure alarm will lock out the pumps until the pressure exceeds **30 psi for more than 60 seconds.** The pumps should be capable of running in Hand during a Low Low Suction alarm.

All pressure alarms will be operator selectable.

A loss of phase alarm will result in an alarm and will lock out the pumps until they are reset with the reset button at the SCADA interface @ the station.

If a pump is called to run and it fails to run then a pump fail alarm shall occur. If it is the lead pump which fails to run the lag pump will automatically become the lead pump and operate at the preset parameters for the lead pump.

Pump run times will be recorded on the SCADA pump run screen @ the WTP.

Real time Flow rate will be visible on the SCADA screen @ the WTP.

Suction and Discharge Pressures will be visible on the SCADA screen @ the WTP.

There will be a loss of radio alarm for this station. The radio will be provided with battery back up.

This station will also have alarms for intrusion, high and low building temperature and power failure.

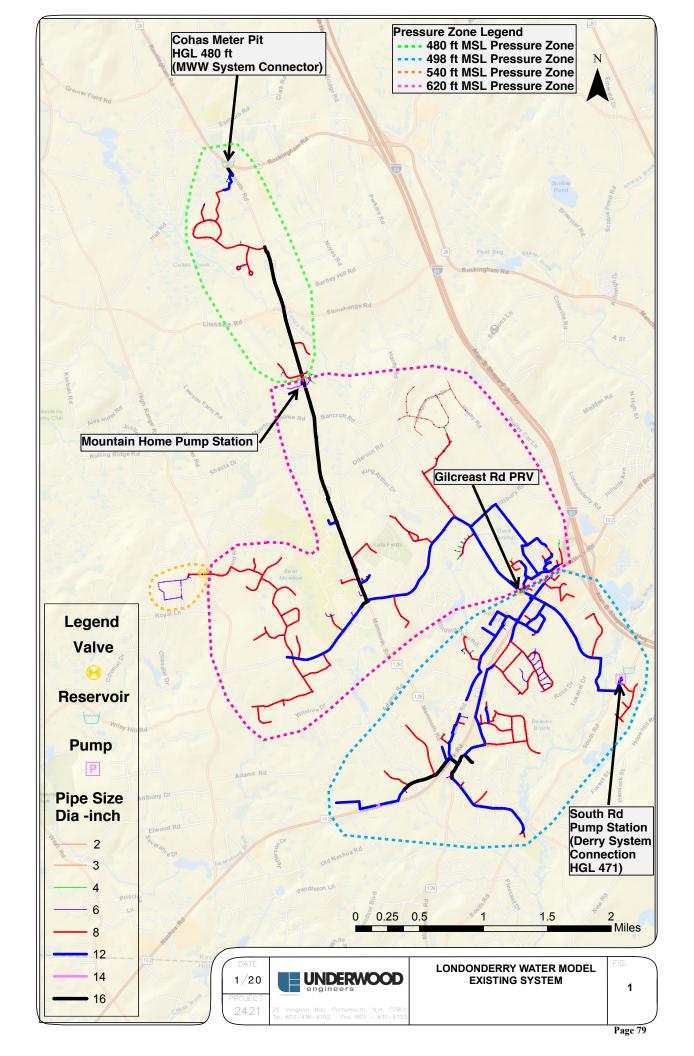

All lead and lag start and stop flow settings will be adjustable from the SCADA interface.

Historical trending shall be available as follows:

a. Suction Pressure, Discharge Pressure, and Flow rate.

## SPECIAL CONTRACT – WATER CONTRACT NO. NHPUC 2018-\_\_ PENNICHUCK EAST UTILITY, INC.

#### WITH

## PILLSBURY REALTY DEVELOPMENT, LLC FOR WOODMONT COMMONS

Date of Execution:	
Effective Date:	
Date of Termination:	
Authorized in Docket No. DW	<i>T</i>
NHPUC Order No.	
Dated:	

#### SPECIAL CONTRACT FOR WATER SUPPLY SERVICE

This special contract for water supply service ("Agreement") is made and entered into this \_\_\_\_\_ day of \_\_\_\_\_, 2019-2020 by and between Pennichuck East Utility, Inc. ("PEU"), a regulated public utility pursuant to RSA 362:2, with an address of 25 Manchester Street, Merrimack, New Hampshire 03054, and Pillsbury Realty Development, LLC ("Pillsbury"), a registered New Hampshire business and principal developer of the Woodmont Commons Planned Unit Development ("Woodmont Commons") (together, "Parties").

#### **RECITALS**

WHEREAS, PEU was authorized by the N.H. Public Utilities Commission ("NHPUC") to provide water service in portions of the Town of Londonderry. See, Docket No. DE 86-230, Order No. 18,691, Southern New Hampshire Water Company, Inc., (May 29, 1987) (approving transfer of franchise to Pennichuck Corporation), Docket No. DE 86-230, Order No. 18,760, Southern New Hampshire Water Company, Inc., (July 14, 1987) (approving Southern's request to provide service to undisputed area of Londonderry and conditionally approving franchise to disputed area), and Docket No. DE 86-230, Order No. 18,807, Southern New Hampshire Water Company, Inc., (Sept. 1, 1987) (rescinding awarding disputed franchise area and ordering that disputed area is not awarded to either Southern or Manchester Water Works).

WHEREAS, Pillsbury has received approval from the Town of Londonderry to construct the Woodmont Commons on approximately 603 acres of land near Rt. 102 and Interstate 93 at Exit 4 and proposed Exit 4A. The \$1 billion development is being constructed over the course of several phases and will include new mixed-use buildings, homes, offices, a hotel, retail space, medical and professional offices, and agricultural areas.

WHEREAS, the Woodmont Commons development is located within PEU's authorized franchise area in the Town of Londonderry.

WHEREAS, to meet the future water service needs of PEU and the commercial and residential customers within Woodmont Commons, and, in particular, the Woodmont Commons' fire protection needs, and to satisfy the requirements of the New Hampshire Department of Environmental Services ("NHDES"), PEU is upgrading its system and is constructing a 1.25 million gallon ground level precast prestressed concrete water storage tank, approximately 6,300 linear feet of 16 inch diameter water transmission main, and a 3,500 gallon per minute water booster pumping station n elevated composite style (concrete pedestal and steel tank) water storage tank ("Water Storage Tank") with a capacity of 1.1 million gallons. The 1.25 million gallon water tank will be located on land owned by on PEU-owned land PEU nearadjacent to Woodmont Commons. The transmission main will be on land owned by PEU, public rights of way/roads, and within easements to PEU on land owned/controlled by Pillsbury. The booster station will be constructed within an easement owned/controlled by Pillsbury. The water storage tank, the transmission main, and the water booster station constitute "the Project". The construction budget for the Water Storage TankProject is approximately \$3.1522.835 million dollars.

NOW, THEREFORE, in consideration of the mutual agreements and promises set forth herein and other good and valuable consideration, the receipt and sufficient of which are hereby acknowledged, the Parties agree as follows:

#### CAPITAL CONTRIBUTIONS

- 1. Pillsbury agrees to provide a proportionate capital contribution ("Capital Contribution") to defray the cost of PEU's construction of the Water Storage Tank Project.
- 2. In consideration of Pillsbury's Capital Contribution, PEU agrees to accelerate its construction of the <u>ProjectWater Storage Tank and</u> to enlarge the tank size <u>and the capacity of the booster station</u> to provide <u>potable</u> water and fire protection service with sufficient capacity to supply water to the entirety of Woodmont Commons.
- 3. Construction of the Water Storage Tank Project is planned to provide an in-service date of July 31, 2021 October 1, 2020 ("Operational Date") that is anticipated to coincide with the water and fire protection service needs of the Woodmont Commons Development and otherwise supplement existing capacity available to Woodmont Commons and others within the service area.
- 4. PEU and Pillsbury agree that Pillsbury's payment of the Capital Contribution will be periodic and that the payments will be based on the bid price of the successful bidder selected by PEU through its competitive bidding process.
- a. Pillsbury agrees to make the periodic payments according to Schedule A, Anticipated Project Phases and Fee Schedule. PEU and Pillsbury acknowledge that time is of the essence with respect to PEU's construction of the <a href="Project-Water Storage Tank">Project-Water Storage Tank</a> and Pillsbury's payments to PEU.
- b. Pursuant to Schedule A, Pillsbury agrees to pay PEU fifty-one (51%) percent of the estimated fees associated with the design, permitting, bidding, construction, and construction administration of the <a href="Project-Water Storage Tank project">Project Water Storage Tank project</a>. Pillsbury agrees to pay PEU the Pillsbury share within ten (10) days from the date PEU notifies Pillsbury that PEU intends to commence each Anticipated Project Phase.
- c. Pursuant to Schedule A, Pillsbury agrees to pay PEU fifty-one (51%) percent of the gross-up tax liability for Pillsbury's Contributions in Aid of Construction ("CIAC") triggered by the Water Storage Tank pProject based upon the following formula:

#### Tax Cost = ((CIAC - [CIAC\*(1/Tax Life)\*.5]) / (1-Current Effective Tax Rate)) - CIAC

With a Current Effective Rate of 27.08% (comprised of 21% Federal and 6.08% net State rate, after consideration for Federal deductibility for State taxes), the gross-up percentage is 34.39386%.

Pillsbury agrees to pay PEU the Pillsbury share of the CIAC tax within ten (10) days from the date PEU demands payment of such tax.

d. In the event the estimated fees or taxes depicted on Schedule A differ from the actual fees or taxes, PEU agrees to inform Pillsbury of the updated fee or tax at least thirty (30) days prior to Pillsbury's payment of the Pillsbury share to PEU.

5. Notwithstanding the Operational Date set forth above, the terms of this Agreement shall not take effect or bind either party until any necessary approvals of the NHDES and the New Hampshire Public Utilities Commission ("NHPUC"), as well as the Company's Board of Directors and Shareholder, have been obtained. The final order of the NHPUC approving the Agreement shall constitute the approval date ("Approval Date") of the Agreement.

#### WATER SERVICE

- 6. PEU agrees to operate the Water Storage Tank to the benefit of Woodmont Commons and PEU's other customers in accordance with all applicable laws and regulations.
- 7. Pillsbury and PEU agree that service provided by PEU to customers within the Woodmont Commons development shall be according to the rates, fares, charges, and terms of service applied to other customers and as contained in PEU's approved tariff, as amended from time to time, on file with the NHPUC and according to all applicable laws and regulations, including, NHPUC Chapter Puc 600, *Rules for Water Service* and Chapter Puc 1200, *Uniform Administration of Utility Customer Relations*.

#### **REFUNDS**

- 8. In the event that the <u>ProjectWater Storage Tank project</u> costs come in lower than the total of the Anticipated Project Phases estimates such that there is an overpayment by Pillsbury, PEU shall refund Pillsbury the appropriate percentage of unused funds no later than forty-five (45) days after the Operational Date.
- 9. PEU shall maintain financial and operating records of the construction and use of the <a href="Project-Water Storage Tank">Project-Water Storage Tank</a> and these records shall be available for inspection by Pillsbury or its agent at the office of PEU during regular business hours.

#### CONSTRUCTION OF THE PROJECT<del>TANK</del>

- 10. PEU agrees to apply for and obtain all required permits and government approvals, including but not limited to, those required by the NHPUC and the NHDES, in addition to required State and local permits.
- 11. PEU agrees to prepare all plans, specifications, and other design documents necessary for the tank project, and to make such documents available to Pillsbury for review and comment.
- 12. PEU agrees to issue an invitation to bidders for the tank <u>portion of the pProject</u> to prequalified contractors acceptable to PEU, to secure bids for the required construction <del>services</del> through a competitive bidding method, and to award the contract(s) for construction to the lowest, responsible and responsive bidder. The transmission main and booster station will be <u>publically bid and each portion will be awarded to the lowest responsible bidder qualified to successfully complete the work.</u>
- 13. PEU agrees to supervise, administer, coordinate, and oversee construction of the tank project.

#### LAWS AND REGULATORY APPROVAL

#### 14. GOVERNING LAW AND VENUE

This Agreement shall be governed, construed, and interpreted by, and in accordance with, the laws of the State of New Hampshire. Any actions concerning enforcement of this Agreement or in any way relating to the subject matter of this Agreement shall be adjudicated by the NHPUC, or its successor for resolution of the dispute. Each party to this Agreement expressly agrees to submit to such jurisdiction and venue as required by the NHPUC or its successor.

#### ADDITIONAL PROVISIONS

#### 15. AMENDMENT

No waiver or modification of this Agreement or of any covenant, condition, or limitation contained herein shall be valid unless it is in writing and of a subsequent date, duly signed by the Parties hereto, and subject to any required approval of the NHPUC. No evidence of any waiver or modification shall be offered or received in evidence in any proceeding, arbitration, or litigation between the Parties hereto arising out of or affecting this Agreement, or the rights or obligations of the parties hereunder, unless such waiver or modification is in writing and duly signed by the Parties.

#### 16. WAIVER

Failure of either party to exercise any right under this Agreement shall not be deemed a waiver of such party to exercise at some future time said rights or another right it may have hereunder.

#### 17. DURATION AND TERMINATION

This Agreement shall be exclusive and binding on the Parties from the Approval Date until the Operational Date. Once it is signed and in effect, this Agreement shall supersede and replace all prior agreements between the Parties with respect to the subject matter hereof. The Parties may terminate this Agreement by mutual agreement or as otherwise provided in this Agreement.

#### 18. BINDING EFFECT

The terms and provisions of this Agreement, and the benefits and burdens associated therewith, shall inure to the Parties to this Agreement and their assigns, grantees, and successors in interest but neither this Agreement nor any of the rights, interests, or obligations hereunder shall be assigned by either party hereto without the prior written consent of the other party and the approval of the NHPUC.

#### 19. NOTICES AND PAYMENTS

All notices, requests, demands, and other communications given pursuant to the Agreement shall be in writing and shall be deemed to have been given if they are delivered by hand or by a nationally recognized overnight courier or mailed by certified or registered mail with postage prepaid to either party as the case may be, at the following address or to such other address as the receiving party may have given written notice to the other party:

Notices to Pennichuck East Utility, Inc. shall be delivered to the following address:

Donald L. Ware, Chief Operating Officer Pennichuck East Utility, Inc. 25 Manchester Street Merrimack, NH 03054

Notices to Pillsbury Realty Development, LLC shall be delivered to the following address:

Michael L. Kettenbach, Member Pillsbury Realty Development, LLC 100 Ferry Street Hudson, NH 03051

With a copy to: Ari B. Pollack, Esq. Gallagher, Callahan & Gartrell, P.C. 214 North Main Street Concord, NH 03301

All payments for Capital Contributions required by this Agreement shall be made by cashier's check and be made payable to "Pennichuck East Utility, Inc."

#### 20. COOPERATION TO COMPLETE TRANSACTION

PEU and Pillsbury each covenant and agree to execute and deliver all such other documents and instruments and take any action that may be reasonably necessary or advisable to evidence or effectuate the consummation of the transactions contemplated hereby, assist, and facilitate the provision of the services to be provided herein, and otherwise to carry out the intent of the Parties herein.

#### 21. HEADINGS

The headings in each section of this Agreement are for the convenience of reference only and do not form a part hereof and in no way modify or shall be used to interpret or construe the meaning of this Agreement.

#### 22. COMPLIANCE WITH THE LAW

Each party hereto agrees that it is responsible at its own expense for compliance with all laws and agrees to indemnify, defend, and save harmless the other party from any claim by a third-party arising out of or related to non-compliance with law.

#### 23. COUNTERPARTS

This Agreement may be signed in several counterparts, each of which shall be deemed anoriginal and such counterparts shall constitute one and the same instrument.

#### 24. SEVERABILITY

If any term or provision herein shall be judicially determined to be void or of no effect, such determination shall not affect the validity of the remaining terms and provisions.

#### 25. AUTHORITY

Each party represents that it has undertaken all actions necessary for corporate approval of this Agreement, and that the person signing the Agreement has the authority to bind the respective party.

IN WITNESS WHEREOF, the Parties have caused this Agreement to be signed by their authorized representatives:

## SPECIAL CONTRACT – WATER CONTRACT NO. NHPUC 2018-\_\_

#### PENNICHUCK EAST UTILITY, INC.

#### WITH

## PILLSBURY REALTY DEVELOPMENT, LLC FOR WOODMONT COMMONS

Date of Execution:	
Effective Date:	
Date of Termination:	
Authorized in Docket No. DW	<i>T</i>
NHPUC Order No.	
Dated:	

#### SPECIAL CONTRACT FOR WATER SUPPLY SERVICE

	This special c	ontract for water supply service ("Agreement") is made and entered into
this	day of	, 2020 by and between Pennichuck East Utility, Inc. ("PEU"), a
regula	ted public utilit	y pursuant to RSA 362:2, with an address of 25 Manchester Street,
Merrii	mack, New Har	npshire 03054, and Pillsbury Realty Development, LLC ("Pillsbury"), a
registe	ered New Hamp	shire business and principal developer of the Woodmont Commons
Planne	ed Unit Develor	oment ("Woodmont Commons") (together, "Parties").

#### RECITALS

WHEREAS, PEU was authorized by the N.H. Public Utilities Commission ("NHPUC") to provide water service in portions of the Town of Londonderry. See, Docket No. DE 86-230, Order No. 18,691, Southern New Hampshire Water Company, Inc., (May 29, 1987) (approving transfer of franchise to Pennichuck Corporation), Docket No. DE 86-230, Order No. 18,760, Southern New Hampshire Water Company, Inc., (July 14, 1987) (approving Southern's request to provide service to undisputed area of Londonderry and conditionally approving franchise to disputed area), and Docket No. DE 86-230, Order No. 18,807, Southern New Hampshire Water Company, Inc., (Sept. 1, 1987) (rescinding awarding disputed franchise area and ordering that disputed area is not awarded to either Southern or Manchester Water Works).

WHEREAS, Pillsbury has received approval from the Town of Londonderry to construct the Woodmont Commons on approximately 603 acres of land near Rt. 102 and Interstate 93 at Exit 4 and proposed Exit 4A. The \$1 billion development is being constructed over the course of several phases and will include new mixed-use buildings, homes, offices, a hotel, retail space, medical and professional offices, and agricultural areas.

WHEREAS, the Woodmont Commons development is located within PEU's authorized franchise area in the Town of Londonderry.

WHEREAS, to meet the future water service needs of PEU and the commercial and residential customers within Woodmont Commons, and, in particular, the Woodmont Commons' fire protection needs, and to satisfy the requirements of the New Hampshire Department of Environmental Services ("NHDES"), PEU is upgrading its system and is constructing a 1.25 million gallon ground level (less than 35 feet high) precast prestressed concrete water storage tank, approximately 6,300 linear feet of 16-inch diameter water transmission main, and a 3,500 gallon per minute water booster pumping station. The 1.25 million gallon water tank will be located on land owned by PEU near Woodmont Commons. The transmission main will be on land owned by PEU, public rights of way/roads, and within easements to PEU on land owned/controlled by Pillsbury. The booster station will be constructed within an easement owned/controlled by Pillsbury. The water storage tank, the transmission main, and the water booster station constitute "the Project". The construction budget for the Project is approximately \$3.152 million dollars.

NOW, THEREFORE, in consideration of the mutual agreements and promises set forth herein and other good and valuable consideration, the receipt and sufficient of which are hereby acknowledged, the Parties agree as follows:

#### CAPITAL CONTRIBUTIONS

- 1. Pillsbury agrees to provide a proportionate capital contribution ("Capital Contribution") to defray the cost of PEU's construction of the Project.
- 2. In consideration of Pillsbury's Capital Contribution, PEU agrees to accelerate its construction of the Project to enlarge the tank size and the capacity of the booster station to provide potable water and fire protection service with sufficient capacity to supply water to the entirety of Woodmont Commons.
- 3. Construction of the Project is planned to provide an in-service date of July 31, 2021("Operational Date") that is anticipated to coincide with the water and fire protection service needs of the Woodmont Commons Development and otherwise supplement existing capacity available to Woodmont Commons and others within the service area.
- 4. PEU and Pillsbury agree that Pillsbury's payment of the Capital Contribution will be periodic and that the payments will be based on the bid price of the successful bidder selected by PEU through its competitive bidding process.
- a. Pillsbury agrees to make the periodic payments according to Schedule A, Anticipated Project Phases and Fee Schedule. PEU and Pillsbury acknowledge that time is of the essence with respect to PEU's construction of the Project and Pillsbury's payments to PEU.
- b. Pursuant to Schedule A, Pillsbury agrees to pay PEU fifty-one (51%) percent of the estimated fees associated with the design, permitting, bidding, construction, and construction administration of the Project. Pillsbury agrees to pay PEU the Pillsbury share within ten (10) days from the date PEU notifies Pillsbury that PEU intends to commence each Anticipated Project Phase.
- c. Pursuant to Schedule A, Pillsbury agrees to pay PEU fifty-one (51%) percent of the gross-up tax liability for Pillsbury's Contributions in Aid of Construction ("CIAC") triggered by the Project based upon the following formula:

#### Tax Cost = ((CIAC - [CIAC\*(1/Tax Life)\*.5]) / (1-Current Effective Tax Rate)) - CIAC

With a Current Effective Rate of 27.08% (comprised of 21% Federal and 6.08% net State rate, after consideration for Federal deductibility for State taxes), the gross-up percentage is 34.39386%.

Pillsbury agrees to pay PEU the Pillsbury share of the CIAC tax within ten (10) days from the date PEU demands payment of such tax.

- d. In the event the estimated fees or taxes depicted on Schedule A differ from the actual fees or taxes, PEU agrees to inform Pillsbury of the updated fee or tax at least thirty (30) days prior to Pillsbury's payment of the Pillsbury share to PEU.
- 5. Notwithstanding the Operational Date set forth above, the terms of this Agreement shall not take effect or bind either party until any necessary approvals of the NHDES and the New

Hampshire Public Utilities Commission ("NHPUC"), as well as the Company's Board of Directors and Shareholder, have been obtained. The final order of the NHPUC approving the Agreement shall constitute the approval date ("Approval Date") of the Agreement.

#### WATER SERVICE

- 6. PEU agrees to operate the Water Storage Tank to the benefit of Woodmont Commons and PEU's other customers in accordance with all applicable laws and regulations.
- 7. Pillsbury and PEU agree that service provided by PEU to customers within the Woodmont Commons development shall be according to the rates, fares, charges, and terms of service applied to other customers and as contained in PEU's approved tariff, as amended from time to time, on file with the NHPUC and according to all applicable laws and regulations, including, NHPUC Chapter Puc 600, *Rules for Water Service* and Chapter Puc 1200, *Uniform Administration of Utility Customer Relations*.

#### **REFUNDS**

- 8. In the event that the Project costs come in lower than the total of the Anticipated Project Phases estimates such that there is an overpayment by Pillsbury, PEU shall refund Pillsbury the appropriate percentage of unused funds no later than forty-five (45) days after the Operational Date.
- 9. PEU shall maintain financial and operating records of the construction and use of the Project and these records shall be available for inspection by Pillsbury or its agent at the office of PEU during regular business hours.

#### CONSTRUCTION OF THE PROJECT

- 10. PEU agrees to apply for and obtain all required permits and government approvals, including but not limited to, those required by the NHPUC and the NHDES, in addition to required State and local permits.
- 11. PEU agrees to prepare all plans, specifications, and other design documents necessary for the tank project, and to make such documents available to Pillsbury for review and comment.
- 12. PEU agrees to issue an invitation to bidders for the tank portion of the Project to prequalified contractors acceptable to PEU, to secure bids for the required construction through a competitive bidding method, and to award the contract(s) for construction to the lowest, responsible and responsive bidder. The transmission main and booster station will be publically bid and each portion will be awarded to the lowest responsible bidder qualified to successfully complete the work.
- 13. PEU agrees to supervise, administer, coordinate, and oversee construction of the tank project.

#### LAWS AND REGULATORY APPROVAL

#### 14. GOVERNING LAW AND VENUE

This Agreement shall be governed, construed, and interpreted by, and in accordance with, the laws of the State of New Hampshire. Any actions concerning enforcement of this Agreement or in any way relating to the subject matter of this Agreement shall be adjudicated by the NHPUC, or its successor for resolution of the dispute. Each party to this Agreement expressly agrees to submit to such jurisdiction and venue as required by the NHPUC or its successor.

#### ADDITIONAL PROVISIONS

#### 15. AMENDMENT

No waiver or modification of this Agreement or of any covenant, condition, or limitation contained herein shall be valid unless it is in writing and of a subsequent date, duly signed by the Parties hereto, and subject to any required approval of the NHPUC. No evidence of any waiver or modification shall be offered or received in evidence in any proceeding, arbitration, or litigation between the Parties hereto arising out of or affecting this Agreement, or the rights or obligations of the parties hereunder, unless such waiver or modification is in writing and duly signed by the Parties.

#### 16. WAIVER

Failure of either party to exercise any right under this Agreement shall not be deemed a waiver of such party to exercise at some future time said rights or another right it may have hereunder.

#### 17. DURATION AND TERMINATION

This Agreement shall be exclusive and binding on the Parties from the Approval Date until the Operational Date. Once it is signed and in effect, this Agreement shall supersede and replace all prior agreements between the Parties with respect to the subject matter hereof. The Parties may terminate this Agreement by mutual agreement or as otherwise provided in this Agreement.

#### 18. BINDING EFFECT

The terms and provisions of this Agreement, and the benefits and burdens associated therewith, shall inure to the Parties to this Agreement and their assigns, grantees, and successors in interest but neither this Agreement nor any of the rights, interests, or obligations hereunder shall be assigned by either party hereto without the prior written consent of the other party and the approval of the NHPUC.

#### 19. NOTICES AND PAYMENTS

All notices, requests, demands, and other communications given pursuant to the Agreement shall be in writing and shall be deemed to have been given if they are delivered by hand or by a nationally recognized overnight courier or mailed by certified or registered mail with postage prepaid to either party as the case may be, at the following address or to such other address as the receiving party may have given written notice to the other party:

Notices to Pennichuck East Utility, Inc. shall be delivered to the following address:

Donald L. Ware, Chief Operating Officer Pennichuck East Utility, Inc. 25 Manchester Street Merrimack, NH 03054

Notices to Pillsbury Realty Development, LLC shall be delivered to the following address:

Michael L. Kettenbach, Member Pillsbury Realty Development, LLC 100 Ferry Street Hudson, NH 03051

With a copy to: Ari B. Pollack, Esq. Gallagher, Callahan & Gartrell, P.C. 214 North Main Street Concord, NH 03301

All payments for Capital Contributions required by this Agreement shall be made by cashier's check and be made payable to "Pennichuck East Utility, Inc."

#### 20. COOPERATION TO COMPLETE TRANSACTION

PEU and Pillsbury each covenant and agree to execute and deliver all such other documents and instruments and take any action that may be reasonably necessary or advisable to evidence or effectuate the consummation of the transactions contemplated hereby, assist, and facilitate the provision of the services to be provided herein, and otherwise to carry out the intent of the Parties herein.

#### 21. HEADINGS

The headings in each section of this Agreement are for the convenience of reference only and do not form a part hereof and in no way modify or shall be used to interpret or construe the meaning of this Agreement.

#### 22. COMPLIANCE WITH THE LAW

Each party hereto agrees that it is responsible at its own expense for compliance with all laws and agrees to indemnify, defend, and save harmless the other party from any claim by a third-party arising out of or related to non-compliance with law.

#### 23. COUNTERPARTS

This Agreement may be signed in several counterparts, each of which shall be deemed anoriginal and such counterparts shall constitute one and the same instrument.

#### 24. SEVERABILITY

If any term or provision herein shall be judicially determined to be void or of no effect, such determination shall not affect the validity of the remaining terms and provisions.

#### 25. AUTHORITY

Each party represents that it has undertaken all actions necessary for corporate approval of this Agreement, and that the person signing the Agreement has the authority to bind the respective party.

IN WITNESS WHEREOF, the Parties have caused this Agreement to be signed by their authorized representatives:
