To Whom it May Concern,

Today Saturday Dec19th 2020 our water is the worst it has been. I've attached pictures of what the water looks like from our faucet and in the toilet. We have a water filtration system and have been running it extra and the water is still this bad. I know you are in the middle of working on the community well but the water seems to be getting worse and we are not able to drink this. I'm going to have to buy bottled water to make sure my family doesn't get sick. Please follow up with me,
thank you.
