**CLEC RATE SCHEDULE
 COVER SHEET**

1. General Information

Federal Identification Number 56-1978988

CLEC Authorization Number _____ OR Date of Application 09/08/05

Legal Name Access Point, Inc.

Trade Name (d/b/a) _____
 in New Hampshire _____

Regulatory Contact Jason Brown

Complete Mailing Address 1100 Crescent Green, Suite 109
Cary, North Carolina 27518

Phone Number 919-851-4838

Fax Number 919-851-4274

E-mail Address tforte@tminc.com

2. Attachments

Attach rate sheets, and include

Any rate schedule of more than ten pages shall include a table of contents and numbered pages.

3. Signature

I certify that the information on this form is true and correct to the best of my knowledge and belief subject to the penalty for making unsworn false statements under RSA 641:3.

Authorized Representative Signature Title Consultant to Access Point, Inc.

Printed Name Thomas M. Forte Date May 30, 2013

If you have any questions, please call the New Hampshire Public Utilities Commission at 603-271-2431.
 Please mail any documents to the above address.

SECTION 1 - SWITCHED ACCESS RATES, (CONT'D.)

1.1 General, (Cont'd.)

1.1.1 Identification and Rating of VoIP-PSTN Traffic, (Cont'd.)

B. Scope

Relevant VoIP-PSTN Traffic is the traffic exchanged in time division multiplexing ("TDM") format that originates and/or terminates in Internet protocol ("IP") format. This section governs the identification of VoIP-PSTN Traffic that is required to be compensated at interstate access rates (unless the parties have agreed otherwise) by the Federal Communications Commission in its Report and Order in WC Docket Nos. 10-90 et. al., FCC No. 11-161, as Amended and Revised, (November 18, 2011) ("FCC Order"). Specifically, this section establishes the method of separating such traffic (referred to in this tariff as "Relevant VoIP-PSTN Traffic") from the Customer's traditional intrastate access traffic, so that such Relevant VoIP-PSTN Traffic can be billed in accordance with the FCC Order. (T)

C. Rating of Relevant VoIP-PSTN Traffic (T)

The Relevant VoIP-PSTN Traffic identified in accordance with this tariff section will be billed in accordance with the Company's applicable interstate switched access rates in Tariff FCC No. 2. (T)

D. Calculation and Application of Percent-VoIP-PSTN-Usage Factor (T)

The Company will determine the number of Relevant VoIP-PSTN Traffic minutes of use ("MOU") to which interstate rates will be applied under subsection (C), above, by applying a Percent VoIP Usage ("PVU") factor to the total intrastate access MOU (however determined – either based on call detail information or PIU) exchanged between the Company and the Customer. The PVU will be derived and applied as follows:

1. The Customer will calculate and furnish to the Company a factor (the "PVU-A") representing the whole number percentage of the total access MOU that the Customer exchanges with the Company in the State, that (a) is sent to the Company and that originates in IP format; or (b) is received from the Company and terminates in IP format. This PVU-A shall be based on information such as the number of the Customer's retail VoIP subscriptions in the state (e.g., as reported on FCC Form 477), traffic studies, actual call detail, or other relevant and verifiable information.

Issued: May 31, 2013

Effective: July 1, 2013

NHa1301

SECTION 1 - SWITCHED ACCESS RATES, (CONT'D.)**1.1 General, (Cont'd.)****1.1.1 Identification and Rating of VoIP-PSTN Traffic, (Cont'd.)****D. Calculation and Application of Percent-VoIP-PSTN-Usage Factor, (cont'd.)**

2. Company will, likewise, calculate a factor (the "PVU-B") representing the percentage of the Company's total access MOU in the State that the Company originates or terminates in IP format. This PVU-B shall be based on information such as the number of the Company's retail VoIP subscriptions in the state (e.g., as reported on FCC Form 477), traffic studies, actual call detail, or other relevant and verifiable information.
3. The Company will use the PVU-A and PVU-B factors to calculate an effective PVU factor that represents the percentage of total access MOU exchanged between the Company and the Customer that is originated and/or terminated in IP format, whether at the Company's end, at the Customer's end, or at both ends. The effective PVU factor will be calculated as the sum of: (A) the PVU-A factor and (B) the PVU-B factor times (1.0 minus the PVU-A factor).
4. The Company will apply the effective PVU factor to the total intrastate access MOU exchanged with the Customer to determine the number of Relevant VoIP-PSTN Traffic MOUs. (T)

Example 1: The PVU-B is 10% and the PVU-A is 40%. The effective PVU factor is equal to $40\% + (10\% \times 60\%) = 46\%$. The Company will bill 46% of the Customer's intrastate access MOU in accordance with the Company's applicable interstate switched access tariff.

Example 2: The PVU-B is 10% and the PVU-A is 0%. The effective PVU factor is $0\% + (100\% \times 10\%) = 10\%$. The Company will bill 10% of the Customer's intrastate access MOU in accordance with the Company's applicable interstate switched access tariff.

Example 3: The PVU-A is 100%. No matter what the PVU-B factor is, the effective PVU is 100%. The Company will bill 100% of the Customer's intrastate access MOU in accordance with the Company's applicable interstate switched access tariff.
