

Energy Efficiency Program

Are energy costs putting pressure on your business's bottom line?

Would you like help finding a way to save money and energy and get help to pay for it????

RMANH can do that! We have a grant funded, 3 Phase Energy Program that will make it easy for you to reduce your energy costs.

Phase 1 Energy Assessment

Looks at the building as an interactive system and reviews lighting, building shell insulation/air infiltration and mechanical systems including HVAC to evaluate potential opportunities. The assessment will provide you with a summary of your energy usage and identifies areas in need of improvement. It will also provide some basic estimates for project costs and energy savings, as well as an estimate of the cost of the Phase 2 Audit. The assessment is completely paid for by RMANH (approximate \$1,500 value). **There is a \$100 application fee, however, this is waived for RMANH members.**

Phase 2 Comprehensive Audit

More deeply investigates the issues identified in Phase 1 as well as defining specific remedies to improve the efficiency of the building and lower your utility bills. The estimates for costs and savings are further defined. You will also receive a detailed scope of work for specific projects to present to contractors in order to receive comparable bids/proposals. **RMANH pays up to 60% of the cost of this audit, (the cost and scope of the Phase 2 audit is specific to each building and the existing condition of that building).**

Phase 3 Implementation

RMANH will rebate up to 20% of the cost of implemented energy efficiency measures (up to a \$30,000 rebate.) We will also assist you in securing utility rebates to further lower project costs and educate you on tax incentives and loan programs available. **Depending on the measures being implemented and the funding sources qualified for, savings off the cost of implementation could range from 20%-50%.**

Giving Power Back... One Business at a Time

If you are interested in making an investment in your building to reduce your energy costs and improve comfort, this program will help you achieve your goals. There is no commitment required; you can drop out of the program at any phase.
