S-1 REVENUE BY RATES

- 1. Report below, for each rate schedule in effect during the year, revenue and average number of customers.
- If the sales under any rate schedule are classified in more than one revenue account, list the rate schedule under each applicable revenue account subheading.
- Where the same customers are served under more than one rate schedule in the same revenue account classification, the entries in column (c) for the special schedule should denote the duplication in number of reported customers.
- 4. Number of customers should be reported on the basis of number of meters, plus number of flat rate accounts, except that where separate meter readings are added for billing purposes, one customer shall be counted for each group of meters so added. The average number of customers means the average of the twelve figures at the close of each month.
